THE JOURNEY OF

NIFTYRAVEN

NFTRVN MAIN ASSET MINTED

January 31, 2022,
The main
asset "NFTRVN" was
minted
on Ravencoin
Blockchain

NFTRVN.net Founded

On February 2, 2022 the domain
was founded. (Every transaction
was manual for over one year!)
From this day.

On March 16, 2022 the first
giveaway was
won by @crypto_eye_head (
handle)

NFTRVN's 1st RVN GIVEAWAY

INKED was BORN!

ON April 30th 2022, A secret
collaboration between Nifty Raven
and MIRAGervn. Obviously, the secret
got out! The details of the art leaked
to Twitter. An abstract success! A
surely EXCITING collection!

ON July 5th 2022, The heist collection
was created. A Collab
of Ravencoin's top artists from all
walks of life, teamed up to bring this
to life. Unfortunately, this collection
was left uncompleted. Sometimes you
win, sometimes you lose. Perseverance
is key.

THE HEIST!

On September 4th 2022 a Nifty Pickle was BORN!
These pickles are quite NIFTY! Sending Rewards
through the
Blockchain! The holders of these pickles are surely
holders
of NIFTYRAVEN.COM Tokens!

On October 23rd
2022
NIFTYRAVEN.COM
Main asset was
MINTED!!

NIFTYRAVEN.COM MAIN ASSET MINTED!

NiftyMon

On January 4th 2023, NIFTYMON
was minted as a MAIN ASSET on
Ravencoin Blockchain!

NIFTY RAVEN TURNS ONE!

On January 31, 2023 NiftyRaven Survived ONE
Year! (Marked 1 full year of consecutive reward
distributions. 12 of 12 months of rewards being
issued!)

ARTWORK COMPLETED FOR SEASON ONE NIFTYMON

On January 31, 2023 NIFTYMON collection
minted the last artwork NFT for the NIFTYMON
Season: 1 "Capture" event. Using Tokens to
capture NIFTYMON NFTs with NIFTYBALLS!

ARTWORK COMPLETED FOR SEASON: ONE NIFTYMON

On April 22nd 2023, The NIFTYMON collection
minted the fist TRUE Generatively Minted NFT
for NIFTYMON Season: 1.
#5 of #2500 Minted! The code was set to
Nifty Tron - Shiny only for the first 5!

GENERATIVE MINTING BEGINS INSIDE DISCORD!

On April 23rd 2023, The
Generative Minting of
NIFTYMON officially began.
A collection generatively
minted LIVE to Ravencoin
Blockchain within DISCORD!

WHATS IN STORE FOR 2024???

AT NIFTYRAVEN.COM, OWNERSHIP IS NOT ABOUT PURCHASING POWER—IT'S ABOUT PARTICIPATION AND CONTRIBUTION. OUR TOKENS CANNOT BE BOUGHT; THEY ARE EARNED THROUGH ENGAGEMENT—WHETHER THAT'S THROUGH SOCIAL MEDIA, THE COMMUNITY, OR BY HELPING TO IMPROVE THE PROJECT. THE ONLY WAY TO OBTAIN OUR ASSETS IS BY CONTRIBUTING TO THE PROJECT. HOLDING EVEN THE SMALLEST FRACTION OF A NIFTYRAVEN.COM ASSET CONFERS A SENSE OF OWNERSHIP OVER THE MARKETPLACE, AND THE MARKETPLACE IS THE COMMUNITY. FROM MARKETING TO REWARDS, IT'S ALL DRIVEN BY COMMUNAL EFFORT AND CONTRIBUTION. THERE ARE NO FEES TO PARTICIPATE IN THE PROJECT. THE NUMBER OF ASSETS YOU CAN OBTAIN IS LIMITED BY THE SUSTAINABILITY OF OUR DISCORD AND THE COMMUNITY. AS SUCH, ACCUMULATING TOKENS TRANSLATES TO PROPORTIONAL OWNERSHIP. FOR INSTANCE, HOLDING 1% OF THE TOTAL SUPPLY OF NIFTYRAVEN.COM ASSETS GIVES YOU 1% OF THE TOTAL SUPPLY OF NIFTYRAVEN.COM ASSETS. OF COURSE, FOR LEGAL CLARITY, THIS FORM OF OWNERSHIP IS DISTINCT FROM THE RESPONSIBILITIES AND LIABILITIES ASSOCIATED WITH OWNERSHIP. WE WELCOME YOU TO PARTICIPATE IN THE PROJECT AND WE WELCOME YOU TO PARTICIPATE IN THE PROJECT. WELCOME TO NIFTYRAVEN, WHERE YOU DEFINE YOUR PRESENCE AND YOUR LEGACY.

Prof. Nifty Raven	Command	Description	Pre-Requirements	Asset Costs/Spent	Example	Category
	address	Registers Ravencoin address for NiftyRaven Discord - General & Niftymon	Ravencoin Address	-	!address R9JXUrL8vFgVWE6Ck5KMgQ8zNjqY7Vdxxo	NiftyRaven.com / NIFTYMON
Prof. Nifty Raven	!buy	The `buy` command allows users to purchase NIFTYMON tokens at a rate of 150 RVN per token. Users must send the required amount of RVN to a specified address and provide the transaction id (txid) for validation, after which their token balance is updated accordingly. The `buy_pack` command allows users to purchase a pack of 10 NIFTYMON tokens at a discounted price of 100 RVN per token, by sending 1000 RVN to a specified address. After validating the transaction and ensuring the correct amount was sent, the user's balance is updated, and they are rewarded with additional NIFTYRAVEN.COM assets. The command also includes a feature where a random NIFTYMON trainer is REWARDED, and a 6% fee is sent to the Nifty Raven Reward wallet. The niftymonvip command facilitates the purchase of the NIFTYMON VIP role for 1250 RVN, requiring users to send the RVN to a specified address and provide the transaction id (txid) for validation, after which they are granted the VIP role and their balance is updated by 15 Niftymon Tokens	150 RVN / Ravencoin Address registered with !address command.	RVN	!buy 2	NIFTYMON
Prof. Nifty Raven	!buy_pack	The `buy` command allows users to purchase NIFTYMON tokens at a rate of 150 RVN per token. Users must send the required amount of RVN to a specified address and provide the transaction id (txid) for validation, after which their token balance is updated accordingly. The `buy_pack` command allows users to purchase a pack of 10 NIFTYMON tokens at a discounted price of 100 RVN per token, by sending 1000 RVN to a specified address. After validating the transaction and ensuring the correct amount was sent, the user's balance is updated, and they are rewarded with additional NIFTYRAVEN.COM assets. The command also includes a feature where a random NIFTYMON trainer is REWARDED, and a 6% fee is sent to the Nifty Raven Reward wallet. The niftymonvip command facilitates the purchase of the NIFTYMON VIP role for 1250 RVN, requiring users to send the RVN to a specified address and provide the transaction id (txid) for validation, after which they are granted the VIP role and their balance is updated by 15 Niftymon Tokens	1,000 RVN / Ravencoin Address registered with !address command.	RVN	!buy_pack	NIFTYMON
Prof. Nifty Raven	!niftymonvip	The niftymonvip command facilitates the purchase of the NIFTYMON VIP role for 1250 RVN, requiring users to send the RVN to a specified address and provide the transaction id (txid) for validation, after which they are granted the VIP role and their balance is updated by 15 Niftymon Tokens	Ravencoin Address registered with !address command.	RVN	!niftymonvip	NIFTYMON
Prof. Nifty Raven	!addresses	The addresses command provides the total number of addresses holding a specified asset, and details the top 10 holders, including their balance and percentage of the total tokens.	Ravencoin Address	-	!addresses NIFTYMON	NiftyRaven.com
Prof. Nifty Raven	!manual	The manual command sends a NIFTYMON/USER_MANUAL asset to the user's registered address, with a cooldown of one hour to prevent spam, and provides a link to view the manual online if the user hasn't registered an address yet	None / Ravencoin Address registered with !address command.	-	!manual	NIFTYMON
Prof. Nifty Raven	!withdraw	The withdraw command allows users to withdraw a specified amount of NIFTYMON tokens to their registered address, checking first if the user has enough balance, and then updating the user's balance and sending the tokens to their address. The niftymint command allows users to mint a unique NIFTYMON NFT by specifying the amount they want to mint, checking if the user has enough balance, updating the user's balance, and then sending the NFT to the user's address. This command can only be used in a designated channel and has a cooldown of 1 minute to prevent spamming	None / Ravencoin Address registered with !address command.	-	!withdraw 5	NIFTYMON
Prof. Nifty Raven	!niftymint	The niftymint command allows users to mint a unique NIFTYMON NFT by specifying the amount they want to mint, checking if the user has enough balance, updating the user's balance, and then sending the NFT to the user's address. This command can only be used in a designated channel and has a cooldown of 1 minute to prevent spamming	1 NIFTYMON Token / Ravencoin Address registered with !address command.	NIFTYMON Token	!niftymint	NIFTYMON
Prof. Nifty Raven	!support	The support command allows users to show their support by sending at least 25 RVN to a specified address. In return, they will receive 5 NIFTYRAVEN.COM assets every hour, while supplies last. The user is prompted to provide a transaction id (txid) as proof of the RVN transfer. The command then checks if the transaction id (txid) has already been used, validates the transaction, and ensures the required amount of RVN was sent. If everything is in order, the user receives 5 NIFTYRAVEN.COM assets, and the transaction id (txid) is marked as used to prevent reuse.	Ravencoin Address registered with !address command.	RVN	!support	NiftyRaven.com
Prof. Nifty Raven	!rarity	The rarity command provides a comprehensive analysis of a Niftymon's rarity, comparing its stats and rarity to others, and calculates a unique rarity score. It also displays the Niftymon's basic information and overall mint stats. The niftymon command provides detailed information about a	NIFTYMON Mint #	-	!rarity 260	NIFTYMON
Prof. Nifty Raven	!niftymon	specific Niftymon, including its name, rarity, stats, and ability. It also shows the counts of other Niftymons with the same name but different rarities, and displays the Niftymon's battle stats, such as wins losses XP and level. The niftydex command provides detailed information about a	NIFTYMON Mint #	-	!niftymon 260	NIFTYMON
Prof. Nifty Raven	!niftydex	specific Niftymon, including its name, rarity, stats, and ability. It also calculates and displays various appraisal and rarity metrics, such as the number of higher or equal rarity Niftymons, the number of same rarity Niftymons with higher stats, the total number of burned Niftymons, the rarity score, and the appraised floor price in RVN. These metrics help to understand the rarity and value of the account	NIFTYMON Mint #	-	!niftydex 260	NIFTYMON
Prof. Nifty Raven	!account	The account command is used to display the user's NIFTYMON Token balance and Ravencoin address. The command loads the user data then checks if the user's Discord ID. If the user is registered, the command displays the user's NIFTYMON Token balance and Ravencoin address. If the user is not registered, the command informs the user that they have not registered a Ravencoin address. The gift command allows a user to send NIFTYMON tokens to	Ravencoin Address registered with !address command.	-	!account	NIFTYMON
Prof. Nifty Raven	!gift	another user. The sender's balance is checked to ensure they have enough tokens. The command also checks if the sender has reached their daily gift limit. If all checks pass, the tokens are transferred, and the balances are updated accordingly. The loadbalance command provides the user with a deposit address	NIFTYMON Token / Ravencoin Address registered with !address command.	NIFTYMON Token	!gift	NIFTYMON
Prof. Nifty Raven	!loadbalance	to send their Niftymon Tokens to. After sending the tokens, the user should use the !verify <txid> command, providing the transaction id (txid) to verify and update their balance.	Ravencoin Address registered with !address command.	NIFTYMON Token	!loadbalance	NIFTYMON
Prof. Nifty Raven	!verify	The verify command allows users to verify their Niftymon Token deposits by providing a transaction id (txid). The bot will then check if the transaction id (txid) has already been used, fetch the transaction details, and update the user's balance accordingly. If the transaction is valid and includes a NIFTYMON token transfer to the deposit address, the user's balance will be updated, and the transaction id (txid) will be marked as used. The sell command allows users to list their Niftymon for sale. The user specifies the price and the Niftymon Mint # they wish to sell. The bot then provides an address to send the Niftymon asset to and	Ravencoin Address registered with !address command.	-	!verify	NIFTYMON
Prof. Nifty Raven	!sell	waits for the user to provide the transaction id (txid) of the transfer. Once the transaction id (txid) is provided, the bot verifies the transaction, checks that the correct Niftymon asset was sent to the correct address, and then adds the listing to the marketplace. The listing includes the user's ID, address, price, Niftymon Mint #, and The buy_niftymon command allows you to purchase a Niftymon from the marketplace. Simply provide the ID of the Niftymon you wish to purchase, and the bot will guide you through the payment process. Once payment is confirmed, the Niftymon will be transferred to your registered Ravencoin address, and you'll receive a confirmation message. It's a quick and easy way to add new Niftymons to your collection! The browse command allows users to view listings of Niftymons for sale in the marketplace. The user can specify a page number to view listings from that page. The bot then retrieves the listings info from database, calculates the total number of pages, and checks if the specified page number is valid. If the page number is valid, the bot then generates a response that includes the details of each listing on that page, such as the Niftymon's Mint #, name, price, seller, card rarity, HP, ATK, ability, rarity score, floor price, and a link to view the NFT. The response is then sent to the user as an embed.	NIFTYMON NFT / Ravencoin Address registered with !address command.	NIFTYMON Unique Asset	!sell 260	NIFTYMON
Prof. Nifty Raven	!buy_niftymon	The buy_niftymon command allows you to purchase a Niftymon from the marketplace. Simply provide the ID of the Niftymon you wish to purchase, and the bot will guide you through the payment process. Once payment is confirmed, the Niftymon will be transferred to your registered Ravencoin address, and you'll receive a confirmation message. It's a quick and easy way to add new Niftymons to your collection! The browse command allows users to view listings of Niftymons for sale in the marketplace. The user can specify a page number to view listings from that page. The bot then retrieves the listings info from database, calculates the total number of pages, and checks if the specified page number is valid. If the page number is valid, the bot then generates a response that includes the details of each listing on that page, such as the Niftymon's Mint #, name, price, seller, card rarity, HP, ATK, ability, rarity score, floor price, and a link to view the NFT. The response is then sent to the user as an embed.	NIFTYMON NFT / Ravencoin Address registered with !address command.	RVN	!buy_niftymon 260	NIFTYMON
Prof. Nifty Raven	!browse	The browse command allows users to view listings of Niftymons for sale in the marketplace. The user can specify a page number to view listings from that page. The bot then retrieves the listings info from database, calculates the total number of pages, and checks if the specified page number is valid. If the page number is valid, the bot then generates a response that includes the details of each listing on that page, such as the Niftymon's Mint #, name, price, seller, card rarity, HP, ATK, ability, rarity score, floor price, and a link to view the NFT. The response is then sent to the user as an embed.	-	-	!browse 2	NIFTYMON

Prof. Nifty Raven	"!"	delist	The delist command allows users to remove their Niftymon token listings from the marketplace. Users need to provide the Niftymon Mint # they want to delist. The command checks if the user has a listing for the given Niftymon Mint #, removes the listing, and then sends the Niftymon token back to the user's Ravencoin address. If the transaction is successful, the command responds with a message containing the transaction id (txid). If there is an error or the user does not have a listing for the specified Niftymon Mint #, the command responds with an appropriate message.	NIFTYMON NFT listed with Isell / Ravencoin Address registered with laddress command.	-	ldelist 260	NIFTYMON
Prof. Nifty Raven	"!"	burn see explore ready duel leaders	The burn command allows players to permanently destroy their Niftymon character NFTs in exchange for NiftyRaven tokens. When a player burns a Niftymon, the NFT is sent to a burn address, effectively removing it from circulation. In return, the player receives NiftyRaven tokens, the amount of which depends on the rarity of the burned Niftymon. The rarer the Niftymon, the more NiftyRaven tokens the player receives. This process is irreversible, and once a Niftymon is burned, it cannot be recovered. This command adds an interesting dynamic to the game, as players must weigh the benefits of burning a Niftymon against the potential benefits of keeping it. The see command allows players to view their Niftymon character by providing the Mint # associated with the NFT. The bot will search for the specified Niftymon with the corresponding Mint # to the player. If no mint is found, the bot will inform the player that no Niftymon was found with the given Mint #. This command provides a convenient way for players to visually inspect their Niftymon characters directly within the Discord chat. The explore command offers a fun and interactive way for players to embark on virtual adventures, with a chance to find treasures, encounter special Niftymon, or experience unique scenarios. Outcomes are determined randomly, with an 85% chance of finding treasure, 10% chance of encountering a special Niftymon, and 5% chance of not finding any treasure. After the adventure, players receive rewards and their token balance is updated accordingly. The ready command allows players to register their Niftymon for battle. When a player uses the ready command, they need to provide the ID of the Niftymon they want to register. The bot then generates a new address and asks the player to send their Niftymon to that address. Once the player sends the Niftymon and provides the transaction id (txid), the bot verifies the transaction, registers the Niftymon for battle, and then returns the Niftymon to the player's address. If any step fails, the bot sends an error message to the player. This command adds an interactive and immersive element to the game, as players actively participate in preparing their Niftymon. The duel command allows players to initiate a duel with another player. When a player uses the duel command, the bot checks if the player has a registered Niftymon, enough NIFTYMON tokens, and if they are already in the duel queue. If all checks pass, the bot subtracts 1 NIFTYMON token from the player's balance and adds them to the duel queue. If the player is the first in the queue, the bot waits for another player to join. If the player is the second in the queue, the bot starts the duel between the two players. After the duel, the bot clears the queue and updates the duel data. This command adds an interactive and competitive element to the game, as players can challenge each other to duels and test their Niftymon's strength. The leaders command provides a leaderboard showcasing the top 10 Niftymon with the most wins in the game. Players can see which Niftymon are currently dominating the battlefield and strive to get their own Niftymon on the leaderboard. The leaderboard includes the Niftymon Mint #, a link to more information about each Niftymon, and their win-loss record. This feature adds a competitive element to the game, encouraging players to engage more and aim for the stats command allows players to view the battle statistics of a specific Niftymon by entering its ID. The command will display the number of wins, losses, total experience points (XP), and the current level of the Niftymon. This feature helps players keep track of their Niftymon's performance and progress in the game. It also adds an element of strategy, as players can use this information to decide which Niftymon to use in battles to increase their chances of winning. The champ command allows players to find out who the current champion of the game is. By entering this command, the game will display the username of the player who holds the title of champion. This feature adds a competitive element to the game, motivating players to strive for the top spot and earn the prestigious title of champion. The ready3 command allows players to register three Niftymon for a 3v3 battle. Players need to provide the IDs of the three Niftymon they want to register. The game will then guide the player through the process of sending the Niftymon to a specified address and provide a transaction id (txid) for each. Once the transactions are confirmed, the game will register the Niftymon for battle and return them to the player. This feature adds an extra layer of strategy to the game, as players need to carefully select which three Niftymon they want to use in a 3v3 battle, taking into account their strengths and weaknesses. The battle command allows players to initiate a 3v3 battle by registering their three selected Niftymon. Before using this command, players must have already registered their Niftymon using the ready3 command. Upon initiating a battle, the game will check if the player has enough NIFTYMON tokens and if they are not already in the queue for a battle, if all conditions are met, the player will be added to the battle queue, and the game will wait for another player to join the queue. Once another player has joined, the 3v3 battle will commence. This feature adds an exciting multiplayer aspect to the game, allowing players to compete against each other in strategic battles. The team command allows players to view the Niftymon team of another player by mentioning their Discord username. This command will display the names, IDs, and stats (HP, Attack, and Ability) of each Niftymon in the mentioned player's team. This feature is useful for players who want to scout their opponents' teams before a battle or for those who are simply curious about the Niftymon other players have chosen for their teams. This command allows you to register three Niftymon for a basic tournament. You need to provide the IDs of the Niftymon you want to register as arguments. The command will check if the Niftymon are of basic rarity and if they are transferred to a specified address within 15 minutes. After the registration is complete, the command will return your Niftymon to your address. You can only use this	NIFTYMON Mint #	NIFTYMON Unique Asset / NFT	lburn	NIFTYMON

Prof. Nifty Raven	"!"	shiny_register	This command allows you to register three Niftymon for a shiny tournament. You need to provide the IDs of the Niftymon you want to register as arguments. The command will check if the Niftymon are of shiny rarity and if they are transferred to a specified address within 15 minutes. After the registration is complete, the command will return your Niftymon to your address. You can only use this command in a designated channel. The train command provides an exciting opportunity for players to engage in training battles with NPC Niftymons. By spending one token, players can test their Niftymon team's strength and strategy against a randomly generated NPC opponent. Winning the battle rewards players with NIFTYRAVEN.COM Tokens and a chance to find rare treasures, enhancing their in-game assets. Additionally, players earn experience points and kills for their Niftymons, contributing to their overall progress and ranking in the game. This feature adds a fun and rewarding challenge for players, encouraging them to strategically build and train their Niftymon teams. The mined command allows players to view the mining records of their registered Niftymons. By entering the command, the bot will retrieve and display the mining history of each Niftymon associated with the player's account, including the date and amount of tokens mined. This feature provides players with a convenient way to track their Niftymons' mining performance and earnings over time. It also adds an extra layer of transparency and accountability to the game, ensuring that players can easily access and verify their in-game data. The wipe command allows users to remove all their registered Niftymons from battle. When a user invokes this command, the bot will check if the user has any registered Niftymons in the battle data. If they do, the bot will remove the user's Niftymons from the battle data and save the updated data. The user will then receive a confirmation message that their Niftymons have been removed from battle. If the user doesn't have any registered Niftymons, the bot will inform them accordingly. This command provides a convenient way for users to reset their battle lineup.	NIFTYMON Unique Asset / NFT x3	-	!shiny_register 5 260 1262	NIFTYMON

These metrics are used to calculate the rarity score and the appraised floor price of the Niftymon. The command then sends a message to the user with all the information in a fun and engaging format, helping the user understand the value and rarity of their	NIFTYMON Mint #	-	!appraise 260	NIFTYMON
Prof. Nifty Raven	"!"	listnft	The listnft command allows users to list their NFTs for sale on the marketplace. To use this command, users need to provide the name of the NFT and the price in RVN they wish to sell it for. The bot will then generate a new address for the user to send their NFT to. Once the NFT is received, it will be listed for sale at the specified price. The bot will create an embed message with the asset's details and a "Buy" reaction, allowing potential buyers to easily purchase the NFT. All listing data will be saved to nftlistings.json for easy management. The remove_listing command allows users to remove their asset from the marketplace. Simply provide the name of the asset you want to	Ravencoin Unique Asset & NFT & Ravencoin Address registered with !address command.	-	!listnft NFRVN/MIRAGE#Facades_4 500	NiftyRaven.com
Prof. Nifty Raven	"!"	remove_listing	remove, and the bot will handle the rest, including sending the asset back to your registered address and removing the listing from the marketplace. This ensures a hassle-free experience for users who wish to take their assets off the market.	Ravencoin Unique Asset / back to your registered address	-	!remove_listing NIFTYMON#Niftymon_1685	NiftyRaven.com
Prof. Nifty Raven	"!"	listfree	The listfree command allows users to list their NFTs for free on the marketplace. To use this command, users need to provide the name of the NFT they wish to give away for free. The bot will then generate a new address for the user to send their NFT to. Once the NFT is received, it will be listed for free in the designated channel. The bot will create an embed message with the asset's details and a "Free" reaction, allowing potential recipients to easily claim the NFT. All listing data will be saved to nftlistingsfree.json for easy access. The list_token command allows you to easily list your tokens for sale in our marketplace. Simply provide the token name, price per token, and quantity you want to sell, and we'll handle the rest! We'll generate a new address for you to send your tokens to, create a Ravencoin Sub-Asset / Token listing with all the details, and post it in our sub-channel. Your tokens will then be available for potential buyers to purchase. It's a quick and convenient way to reach a wide audience and sell your tokens. The niftyhelp command provides a comprehensive guide on how to	Ravencoin Unique Asset / NFT	Ravencoin Unique-Asset / NFT	!listfree NFRVN/THE.HEIST/10	NiftyRaven.com
