

# Reef Geeks™ Water Prep Workflow

Clean • Sterilise • Neutralise • Grow

A simple, repeatable system for reef keepers.

---

## 1 CultureClean Pro

Clean tools & surfaces

What it does

CultureClean Pro is a spray that sanitises bottles, tanks, caps, funnels, tubing, and work surfaces before use.

How to use

- Spray until surface is visibly wet
- Leave **1 minute contact time**
- Allow to air dry or wipe clean

Reduces contamination before it starts.

---

## 2 SteriMix Pro

Sterilise your water

What it does

SteriMix Pro is a controlled bleach solution used to eliminate bacteria, spores, and unwanted microbes in culture water.

How to use

- Dose 1 mL per litre of water
- Mix well
- Leave **5-10 minutes contact time**

**!** Water is NOT safe yet — chlorine must be neutralised.

---

## 3 Dechlor Pro

### Neutralise chlorine

#### What it does

Dechlor Pro instantly removes chlorine, making water safe for reef systems and phytoplankton.

#### How to use

- **1 mL per litre of water = neutralises chlorine**
- Mix well
- Wait ~1 minute

 Reef-safe • Phyto-safe • Overdose-safe

---

## The Reef Geeks™ Method

 Clean →  Sterilise →  Neutralise

Simple chemistry.

Repeatable results.

Built by reef nerds.
