

Reef Geeks™ Water Prep Workflow

Clean • Sterilise • Neutralise • Grow

A simple, repeatable system for reef keepers and phyto nerds.

1 CultureClean Pro

Clean tools & surfaces

What it does

CultureClean Pro is a spray that sanitises bottles, caps, funnels, tubing, and work surfaces before use.

How to use

- Spray until surface is visibly wet
- Leave **1 minute contact time**
- Allow to air dry or wipe clean

 Reduces contamination before it starts.

2 SteriMix Pro

Sterilise your water

What it does

SteriMix Pro is a controlled bleach solution used to eliminate bacteria, spores, and unwanted microbes in culture water.

How to use

- Dose 1 mL per 1 L of water
- Mix well
- Leave **30–60 minutes contact time**

 Water is NOT safe yet — chlorine must be neutralised.

3 Dechlor Pro

Neutralise chlorine

What it does

Dechlor Pro instantly removes chlorine, making water safe for reef systems and phytoplankton.

How to use

- **1 mL per 1 L water = neutralises 5 ppm chlorine**
- Mix well
- Wait **~1 minute**

✓ Reef-safe • Phyto-safe • Overdose-safe

The Reef Geeks™ Method

 **Clean** →  **Sterilise** →  **Neutralise**

Simple chemistry.
Repeatable results.
Built by reef nerds.
