

Reef Geeks™ Dechlor Pro

Chlorine Neutraliser (Sodium Thiosulfate Solution)

What it is

Dechlor Pro is a reef-safe solution that instantly neutralises chlorine after water sterilisation.

What it does

- Instantly removes free chlorine and chloramine
- Makes treated water safe for reef tanks and phytoplankton
- Prevents chlorine damage to sensitive cultures

Why it's different

Designed for **super-simple dosing**:

1 mL per 1 L water = neutralises Reef Geeks™ SteriMix

Non-toxic, overdose-safe, and essential for any sterilisation workflow.

Dechlor Pro contact time

Reef Geeks™ Dechlor Pro works essentially instantly.

Practical answer

- **Effective contact time: 30 seconds – 2 minutes**
- **Recommended wait before use: 1–2 minutes**
- After mixing, chlorine is neutralised immediately; the extra minute is just to ensure even distribution.
