Q. 1. Read the passage carefully and answer the following questions :

There, once, was a stingy baker. A poor man would stand outside his bakery every day, enjoying the nice smell of baking bread. The baker was very at the poor man. He felt that anyone who smelled his delicious products should pay for the smell. So he took the poor man to the court.

The judge heard the baker's complaint patiently. Then he asked the poor man, "do you have any money?"

The poor man searched his pocket and produced two small coins. "This is all the money I have," he said to the judge.

The judge took the coins from the poor man.

The baker smiled and eagerly held out his hand.

But the judge did not give the baker the money.

Since time began, the natural broad-leaved mixed forests of the Himalayas have played a crucial role in the life of the people of that region. In fact, the forests are the foundation of the whole economy of the hill villages. Green leaves and grass, for example, provide fodder for the animals whose dung is used as fertiliser. Dry twigs and branches are the only sources of domestic cooking fuel. The forests also provides large supplies of fruits;

edible nuts, fibres and herbs for local consumption. The forest breaks the flow of the seasonal rainfall that lashes the slopes of this mountain range every year during the monsoon. This creates springs and perennial streams which are vital for the mountain people and their animals during the hot summer months.

For many years, however, large areas of these rich forest resources have been destroyed. For example, the forests of Tehri Garhwal were exploited to supply timber for the expanding railways network in the plains. The people of Tehri Garhwal in 1930 began a non-cooperation movement called Satyagraha form of peaceful resistance to obtain justice in opposition to the oppressive forest laws.
