

Founded in 2017, Veracity Field Services, LLC was formed on three principles: **Truth, Accuracy** and **Integrity**. These principles drive everyday decisions and management practices. These are not just ideals; they are the core values expected to support every task, of every day, for every client. Veracity Field Services was founded on the idea that there is more to a job than just a paycheck.

At Veracity Field Services, we invest the time, patience and intelligence to cultivate great culture from great people. We are not just another service firm, or staffing agency, that provides warm bodies to fill a spot. We develop our personnel into capable, qualified leaders who will defend our workmanship, and our company, with honesty and integrity while protecting/ensuring the value of our client's assets are never jeopardized.

Veracity Field Services is a company hungry for growth and capable of adaptation and mobility. We service private equity Oil and Water Midstream companies with contract Midstream operators and contract management and consulting services; however we are not limited to Midstream Operations. Its president and leadership team have a combined experience of over 25 years, that allows versatility and the ability for growth. From years spent in Right of Way acquisition, welding inspection and frac engineering—to construction and project management. Veracity has the capability to provide quality personnel and management in many different sectors of the industry.

- Pipeline Construction and Welding Inspection
- Contract Midstream Operators
- Construction and Operations Management
- Project Management
- System Surveillance

At Veracity, we are willing to service any need that might arise. We apply ourselves and dedicate our best resources to seeing projects from conception to completion and ensuring our clients goals are reached in a timely and economic manner. We are willing to expand our services to meet any need that may arise, including:

- Pipeline Construction
- Roustabout crews
- Remediation
- Facility design and construction
