WHITEPAPER

THE COMPANY

SAFETY BANK believes that establishing alliances and strategies results in business synergy, increases contribution channels and drives market growth.

With the aim of consolidating our brand on the blockchain, we studied the market and believed in the idea that projects need to maintain an independent Custody Fund.

Blockchain damage

Attacks on blockchain platforms caused \$3.8 billion in damage in 2020 alone.

- In 2022, 6 DeFi projects carried out \$2.7 million scams, according to data collected by market security companies.*
- Rug pull suspects were tracked and it was found that there were massive transfers of funds using Tornado Cash.*
- According to the mapping, these massive transfers, which totaled more than 5,744 WBNB, reaching the aforementioned loss, which were transferred by (TORN), a decentralized blockchain solution that breaks the link between the sending and destination addresses, to make it impossible to track transfers.*

Reserve for investors

Fund Available for projects that become unfeasible or discontinue

The fund reserved for this event is for exclusive use to reimburse token holders.

The second step will be the phase to register the holders of the tokens that were acquired during the term of the fund. This phase requires a period of 30 (thirty) business days.

In the third phase of the process, we will announce the unit value of each token, which will be indemnified to the holder.

Example:

Guarantee Fund - \$200,000 (includes all deposited balance)

Tokens acquired during the term of the Guarantor Fund - 180,000,000 tokens
