Dear Parent,

Height and weight checks for children in Reception and Year 6

Each year in England, school children in Reception and Year 6 have their height and weight checked at school as part of the National Child Measurement Programme. Height and weight measurements are used to calculate weight status. We collect this information because it is in the public interest to understand how many children are overweight, healthy weight or underweight. Your child's class will take part in this year's programme.

The checks are carried out by trained school nurses or trained health care providers. Children are measured fully clothed, except for their coats and shoes, in a private space away from other pupils.

The information collected by us includes your child's:

- height and weight
- name
- gender
- date of birth
- NHS number
- home address including post code
- ethnicity
- telephone number of parent/ carer

This information about your child is needed because their age, gender, ethnicity and the place they live are known to affect their height and weight. Their name, date of birth and NHS Number is needed to link your child's measurements to other information about your child. All this information is treated confidentially and held securely by us. It will not be shared with your child's school or with other children.

Once completed, we will send you your child's measurements together with information about healthy eating, being active and related activities available in your area. You may also be contacted by telephone for additional support to be offered.

The information collected from all schools in the area will be gathered together and held securely by our local authority public health team. We will store your child's information on their local child health record on the child health information database and share it with their GP. No individual measurements will be given to school staff or other children, and all information will be treated confidentially.

All the information collected about your child will be sent by us to NHS Digital. NHS Digital is responsible for collecting health and care information to check how the NHS and social care services are doing, and to use this to improve the care provided to people across England.

The information collected about your child will also be shared by NHS Digital with Public Health England but in a de-personalised form only. This means Public Health England will not be able to identify your child. Public Health England is responsible for working to protect and improve the nation's health.

Both NHS Digital and Public Health England will use the information from the National Child Measurement Programme to better understand numbers and trends in child weight and body mass index (BMI). This helps with the planning of services to support healthy lifestyles in your area. No information will ever be published by NHS Digital or Public Health England that identifies your child.

If your child was previously measured for the National Child Measurement Programme, NHS Digital may link your child's current and previous height and weight measurements. It may also link their measurements with other information it holds about your child such as their dental survey results or the reasons for any visits they may have made to hospital. Linking your child's information in this way helps better understand how and why the weight status of children is changing.

De-personalised information from the National Child Measurement Programme may also be shared by NHS Digital with other organisations, such as universities. This is to help improve health, care and services through research and planning. This information cannot be used to identify your child, and NHS Digital only ever shares information for research with the approval of an independent group of experts.

Withdrawing your child from the National Child Measurement Programme

If you are happy for your child to be measured, you do not need to do anything.

If you **do not** want your child's height and weight to be checked, please let us know by informing your child's school office who will then share this information with the school nurse.

Children will not be made to take part on the day if they do not want to.

Further information

Further information about the National Child Measurement Programme can be found at <https://www.nhs.uk/live-well/healthy-weight/national-child-measurement-programme>

Information and fun ideas to help your kids stay healthy can be found at <https://www.nhs.uk/change4life>

Information about how NHS Digital and Public Health England collect and use information can be found at <https://digital.nhs.uk/about-nhs-digital/our-work/keeping-patient-data-safe/how-we-look-after-your-health-and-care-information> and <https://www.gov.uk/government/organisations/public-health-england/about/personal-information-charter>

Information about the organisations NHS Digital has shared information from the National Child Measurement Programme can be found at <https://digital.nhs.uk/services/national-child-measurement-programme>

A health session will also be provided at Bothal Upper on Tuesday 29 January from 9.00am - 10.30am, where School Health, Integrated Wellbeing Team and other partners will be on hand to offer advice and information about healthy weight and change for life activities etc. Parents, carers and staff are all invited to join us at this session.

If you have any queries, please do not hesitate to contact Helen Pudney (School Health Area Lead) on 01670 629670.

Yours faithfully,

Liz Morgan
Director of Public Health
