

Carnival

of the Nearly Extinct Animals

Carnival of the Nearly Extinct Animals is a multidisciplinary performance celebrating our planet's most rare and remarkable creatures. Through a seamless blend of **live music, dance**, and larger-than-life **puppetry**, audiences are invited on a captivating journey into the beauty of the natural world.

This World Premiere performance features world-class visiting and local artists, highlighting species of Hawaii including **coral, sea turtles, whales, and kāhuli**.

Curriculum materials will be available to teachers for use both before and after the performance to deepen students' understanding and engagement with the material.

We hope you can join us for this unforgettable experience—a poignant reflection on connection, care, and our shared responsibility for the future of these animals.

CLICK or **SCAN** to register your students today!
