ADVANCED SCHOOL CLIMATE VIRTUAL TRAINING TRAIN THE TRAINER

This 15-hour professional development training session can only be taken after successful completion of School Climate Basic Training and Restorative Practices Training.

Advanced training is an “extension” of School Climate Basic Training. In this session, participants dig deeper into the topics that are covered in the two-day Basic training session, to allow everyone to gain a much richer understanding of the content central to school climate improvement and the imperative to focus on this important work as a primary “driver” for student and school success, both academic and social/behavioral. In addition, participants receive information about different learning styles as well as how to facilitate training for adults.

There are two major goals for Advanced training. First is to be much more knowledgeable and comfortable with school climate “content.” The second goal is to be able to return to their schools/organizations and share/facilitate topics introduced in Basic training to colleagues and other community members. As with Basic training, Advanced training is highly interactive. After the successful completion of Advanced training, participants are provided with all materials necessary for such in-school training in all of the topics covered in Basic training.

Restorative Practices, along with Basic training is the prerequisite for Advanced School Climate training

February 17 & 18, 2022
