## VINYL PINKING REMOVAL

Pinking comes from a hardy and common bacteria that reproduces inside the boat's cushion and, regardless of effort, cannot be wiped or scrubbed off from the cushion's surface using traditional cleaning solutions. This is because the Pinking stain, much like an inkblot on a shirt, is not just on the surface but is soaked all the way through the vinyl fabric. Until now, boat owners were left with little choice but to replace the seats, at great cost, or live with the unsightly stains.

**Permanent removal.  
Simple and safe.  
Will eliminate Pinking in just a  
few treatments**
