SAFETY

MEETING

APRIL 2023

(4/6/23)

SLIPS

TRIPS

FALLS

- **Can occur in any part of the workplace whether inside or outside**
- **May result in serious injuries**
- **Significant cost to both the worker and employer**

SLIPS

SLIPS: Occurs when there is too little friction or traction between your feet and the walking surface, and you lose your balance

TRIPS

TRIPS: Occurs when you are too far off your center of balance due to catching your foot on something.

FALLS

FALLS: Occurs when you move downwards, typically rapidly and freely without control, from a higher to lower level

Common Causes...

SLIPS:

- Wet or oily surfaces
- Occasional spills
- Weather hazards
- Loose, unanchored mats
- Flooring or other walking surfaces that do not have same degree of traction in all areas

TRIPS:

- Obstructed view
- Poor lighting
- Clutter in your walking way
- Wrinkled mats
- Uncovered cables
- Uneven walking surfaces

FALLS: Falls can be a result of both slips and trips. But additionally can occur when ladders or stepping stools are not maintained properly

Prevention...

- Clean up spills immediately
- Wear proper shoes (specifically, non-slip shoes)
- Place wet floor signs
- Use mats in areas prone to water or grease spills
- Announce "corner" when coming around a blind corner
- Keep items secure, to reduce obstructions in walkway

- **IF YOU DROP IT, PICK IT UP**
- **IF YOU SPILL IT, WIPE IT UP**
- **GO WHERE YOU ARE LOOKING, AND
LOOK WHERE YOU ARE GOING**

Accident Investigations

- **Sunday (3/4) at Multnomah Village -- Sprain of the Finger**
- **Cause:** Tried to catch falling container and crushed finger between safe and container
- **How could this be prevented?** Let everything fall to the ground
- **Recommendations:** Although it's a reflex to catch something when falling, just let the items fall to the ground to prevent injury. Just like you never catch a knife when it is falling.

**Any safety, health
or hazard issues
at any of your
locations?**
