

"Time is Money", might have been a useful quote some 250 years ago in Philadelphia, Pennsylvania, but in today's new world of instant information and instant almost everything else; we can easily see that "Time is NOT and is no longer Money" ... because in today's world, Time is Money is Energy, (i.e. TME) is: TIMONERGY and "TME" are those three (3) functions that surround and encapsulate each and every individual all over the world. We've always been doing things with TIMONERGY in mind whether we realize(d) it or not. Even Ben Franklin was speaking about TIMONERGY and wasn't even aware of it 250 CE years ago and so was the great Greek mathematician and inventor, Archimedes being a TIMONERGIST living earlier in 250 BCE ... when Archimedes said: "Give me a lever and I can move the Earth." Or, as famously when he said: "Eureka !"
