

The Data-Shack workshop: W6. Statistica Enterprise (3 Days)

Statistica-ise your business

Prerequisite

Quality Control analytics (3 days)

Objectives

Introducing delegates to:

- an overview of Statistica Enterprise, with worked examples of the various configuration tasks
- modules of Statistica as deployed within your organisation (customised)

Description

This workshop introduces the delegates to Statistica Enterprise, and is customised to reference those modules that your business has installed.

Delegates are trained to operate the system as per their roles and responsibilities, and specifically on those modules which are assigned to their logon credentials.

Outcome

Delegates will leave the workshop with a PDF report of their analysis, enabling them to return to work with insights and an actionable plan.

Topics*

1. Introduction to Statistica Enterprise
 - 1.1. Enterprise Manager overview
 - 1.2. Terms & definitions
 - 1.3. Permissions
2. Overview examples
