WE NEED YOUR INPUT

EPA issued its cleanup plan for the Portland Harbor Superfund site in 2017. Willamette Cove is one area of the site, sitting on the lower Willamette River. The City of Portland, Port of Portland, and State of Oregon will begin designing the in-river cleanup of Willamette Cove in 2021. Community voices are needed to inform decisions about habitat, recreation, and transportation of cleanup materials and waste.

Want to provide input but can't make the workshop dates?

Need accommodations or translation services?
