AI & the Church Code of Ethics

Before You Prompt... Prepare in Spirit.

- Is this idea aligned with God's Word? Have I prayed about what I'm creating?
- What do I want to say to this person or group?
- Have I begun with my own heart, not someone else's voice?

Before You Use AI & Ask:

- Is this aligned with Scripture?
- Am I protecting people's private information?
- Am I replacing intimacy with convenience?

While Using AI... Collaborate With Care.

- Am I guiding the output with my language and message?
- Am I relying too much on a tool and not enough on Scripture or community?

Always Remember:

- Ministry begins with your voice, your *conviction*, and your *relationship* with **Christ.**
- AI is a collaborator, not a substitute for calling.
- The Gospel is eternal. AI is temporary.
- The Gospel flows through the Spirit, not software.
- Technology changes, but God's Word endures.
- Let tools serve the mission - but the mission still requires your discernment, your context, and your devotion.

SHIFT THE Momentum
