## Layout Description

Being an N Gauge modeller, this is my first attempt at a 00 layout. Set in period between 1985-1995 Railfreight/NSE period which allows for a good selection of locos and liveries.

NCE DCC system is used. All the track is Peco code 75 fine scale using Seep point motors operated with pushbuttons. A lot of the buildings are from the Bachmann range. All scatter material is from the Woodland Scenic range. The Signals are from Dapol.

All locos are sound fitted, detailed and weathered, with close coupling of all stock.
