Injection pump shipping Instructions

1. Scrape and clean the exterior of the pump for shipping. Try to remove all accessories and actuators to keep them to put back on your rebuilt pump..

DRAIN fuel/oil from pump (if core leaks it could be held up in hazmat by delivery service).

2. Remove the top plate (3 screws).

3. Stand the pump upside down for almost a day to drain the oil. Replace 3 screws.

Use as many trash bags as needed to keep any excess diesel from leaking.

pack as tight as possible to protect from rough handling and impact.

It is important to include previous emails along with your name,

mailing address, and contact info inside the box.

Wrap and compress the box with generous layers of stretch tape. If the

contents rattle or shift, you must open the box and re-pack as needed.

Thank you for your business! Turn around time is 1-3 days usually ASAP.

**DID YOU INCLUDE A NOTE IN THE BOX WITH YOUR NAME, ADDRESS,
PHONE NUMBER, AND EMAIL ADDRESS?**
