

Z-SCAN METAL DETECTOR

- Z-Scan provides high sensitivity in anti theft applications where small metals objects must be protected jewelry, electronics products, computer Processor tools etc. can be scanned.
- Z-Scan ultra high sensitivity allows a search to be non Intrusive and hands-off by minimizing physical contact with the Object.
- The lightweight construction, comfortable grip. large screening area, fast detection circuitry all contribute to higher screening and reduce operation fatigue and the unit can even detect a small hat pin in high sensitivity mode.

SPECIFICATIONS:-

- * Power Source:
- * DC Dry Cell or Rechargeable.
- * Indication on &Low Battery Through common LED.
- * Current Consumption :Less than 3mA.
- * Operation Temperature : -20°C to +55°C.
- * Operation System: Single push button operation.
- * Weight: 370gm. With Battery (approx.).
- * Width : 82.5mm (approx.).
- * Thickness: 35mm (approx).
- * Length : 420mm (approx).
- * Other features: Fully automatic self adjusting circuits, Instant response, clear audible alarm, no false alarm.

SPECIAL FEATURES:

- * Fast scan rate.
- * High Performance
- * High Sensitivity
- * No False Alarm
- * Fully automatic self adjusting circuit
- * Visual and Audible alarm indicator.
- * Detects al types of metal.
- * Calibration Controller Port.

S.No.	Detects	Distance
1	Medium Pistol	10" (250mm)
2	Pistol, 25 cal	8" (200mm)
3	Mini Revolver, 22 cal.6	6" (150mm)
4	Cartridge 357	4" (100mm)
5	Razor Blade	2" (50mm)
6	Hat Pin	1" (25mm)
