

# SUPERSCAN METAL DETECTOR

- Superscan provides high sensitivity in anti theft applications where small metals objects must be protected jewelry, electronics products, computer Processor tools etc. can be scanned.
- Superscan high sensitivity allows a search to be non Intrusive and hands-off by minimizing physical contact with the Object.
- The lightweight construction, comfortable grip. large screening area, fast detection circuitry all contribute to higher screening and reduce operation fatigue and the unit can even detect a small hat pin in high sensitivity mode.

## SPECIFICATIONS:-

- \* Power Source:
- \* DC Dry Cell or Rechargeable Li-ion.
- \* Indication on &Low Battery Through common LED.
- \* Current Consumption :Less than 15mA.
- \* Operation Temperature : -20°C to +55°C.
- \* Operation System: Single push button operation.
- \* Weight: 370gm. With Battery (approx.).
- \* Width : 76mm (approx.).
- \* Thickness: 38mm (approx).
- \* Length : 419mm (approx).
- \* Other features: Fully automatic self adjusting circuits, Instant response, clear audible alarm, no false alarm.

## SPECIAL FEATURES:

- \* Fast scan rate.
- \* High Performance
- \* High Sensitivity
- \* No False Alarm
- \* Fully automatic self adjusting circuit
- \* Visual and Audible alarm indicator.
- \* Detects al types of metal.
- \* Calibration Controller Port.

S.No.	Detects	Distance
1	Medium Pistol	10" (250mm)
2	Pistol, 25 cal	8" (200mm)
3	Mini Revolver, 22 cal.6	6" (150mm)
4	Cartridge 357	4" (100mm)
5	Razor Blade	2" (50mm)
6	Hat Pin	1" (25mm)
