

# ADVANTAGE TREATING SYSTEMS

The Advantage Air Treating System is a proven, easy-to-use and uniquely designed delivery system for bean and small grain seed treatment. The included components make custom design possible for a variety of treating methods.

## AIR APPLICATION

Refillable container in 10 and 24 gallon sizes.

No power required.

One gallon of compressed air treats 125 bushels.

Graduated liquid level on transparent container.

Dual injection system for auger application.

Air agitation provides continual suspension of product(s).

Treat or inoculate large seed volumes without interruption.

Regulated air pressure & accurate metering valve.

Rounded bottom for complete cleanout.

Approved for use with most seed treatments, liquid inoculants, and liquid micronutrients.

### Air Regulator On Tank

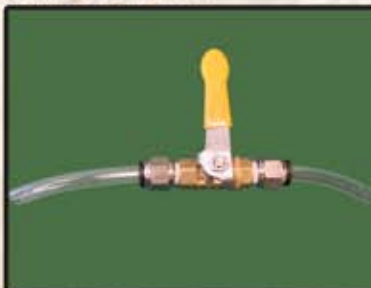

Includes 1/4" air chuck adaptor and 10' air hose. Adapts to your air supply.

### Metering Ball Valve

Desired flow can be obtained with the combination of air pressure and valve adjustment.

### Shut-off Valves

Shut-off can be placed where convenient. (Two included.)

### Injector Assembly

Apply product directly to grain flow for a no-drift, no-mess application. Includes two clamps. Elbows can be removed from tube for cleaning.

### Hose - 30 Ft

Hose easily plugs into fittings for quick connection and removal.

### Lid Hook

Stainless steel hook allows tank lid to be propped open for convenient filling.

***Closed application system reduces human exposure and environmental concerns.***

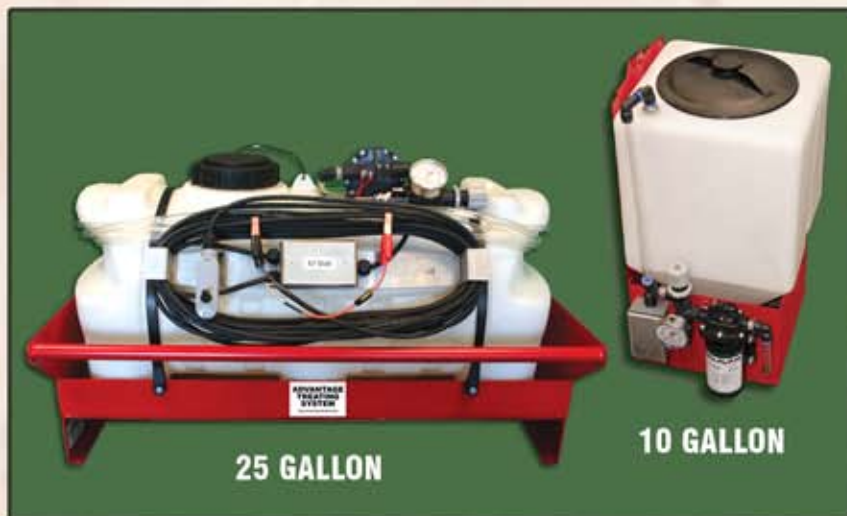

***Sealed auger connection means no chemical drift.***

# ADVANTAGE TREATING SYSTEMS

Applied Ag Equipment ~ Over 25 years of designing and manufacturing agricultural application equipment for herbicides, insecticides, fungicides and seed treatments!

## PUMP APPLICATION

25 GALLON

10 GALLON

### 10 GALLON FEATURES

- Large opening for filling.
- Reinforced top center hole for pivot mounting.
- 4 holes for solid mounting.
- Remove hose from pump to drain tank.

### 25 GALLON FEATURES

- Forklift friendly.
- Bottom holes for mounting.
- Strong, convenient carrying handles.
- 3" bottom rail for strength and protection.
- Tank is bolted and strapped for extra stability.
- Convenient drain.

### FEATURES OF BOTH SYSTEMS

- Available in 12 Volt and 115 Volt.
- Refillable containers.
- Graduated liquid level on see-through container.
- Electric switch on 25' power cord.
- Flat space for label/decals placement.
- Magnetic spray nozzle. Comes with two spray tips.
- Bypass ensures good agitation.
- Approved for use with most seed treatments, liquid inoculants, and liquid micronutrients.

### Flat Space for Decals

### Bypass

### Convenient Drain

### Magnetic Spray Nozzel
