Transjet Eco II

Product Information

A classic performer. Eco II is a coated sublimation paper for digital transfer printing with water-based dye sub inks. It has been designed for non-industrial printers and transfer to various polyester-based materials. Eco II can be used for a wide range of projects which makes it an all arounder.

Product Benefits

High transfer rate

Fast ink-drying
Excellent colour brilliance and colour release
For all-around purposes
Homogeneous colour results
Perfect flatness
Short transfer times
Reduced transfer temperature
High inkload capacity

Excellent runnability and outstanding efficiency

High quality and excellent performance

Product Specification

Top Surface	Coated Uncalendered	
Print Process	Digital Digital printing - Inkjet Plotter	
Conversion Process	Water-based dye sub inks	
Product Type	Dye Sublimation Papers	
Certification	FSC™ Chain of Custody/Controlled Wood (Sappi Europe - Multi-site)	
Format	Reel	
Grammage (gsm)	95g/m²	

Transjet Boost

Product Information

A coated sublimation paper for digital transfer printing with water-based dye sub inks. Designed for transfer to various polyester-based materials.

Product Benefits

Ultra-fast ink drying

Suitable for digital printing on industrial and nonindustrial printers

Appropriate for water-based dye sub inks

High quality and excellent performance

Extremely fast ink absorption and drying

Excellent runnability and outstanding efficiency

Enhanced colour release and densities

Format	Reel		
Grammage (gsm)	70g/m²		

Transjet Sportsline

Product Information

The perfect player for stretchy textiles. Transjet Sportsline is a thermal adhesive coated sublimation paper for digital transfer printing with water based dye sub inks. Designed for non-industrial printers and transfer to very stretchy polyester-based materials such as sportswear or elastic home textiles.

Product Benefits

Tacky effect

High transfer rate

Fast ink-drying

No ghosting with elastic textile as there is no movement between paper and fabric during transfer

Reversible tack between sublimation paper and fabric after transfer

Homogeneous colour results

Perfect flatness
