# Master of Science in Project Management

## Position Yourself to Be in Demand – in Any Industry!

Learn to plan, organize, and manage projects from start to finish, with a Master of Science in Project Management from the UNH College of Professional Studies. In as few as 12 months, you can gain the competencies required for certification as a Project Management Professional (PMP), while further developing the leadership and management skills needed for senior-level positions.

There's never been a better time to enter or advance in the field of project management. Every industry requires leaders with this skill set, but there is a shortage of talent to meet the demand. This 10-course program helps you gain the skills and strategic mindset to lead successful projects in today's competitive global environment. Best of all, you can apply what you learn directly to your workplace and your life.

## Gain the Skills You Need to Be a Certified Project Manager

### Learn to:

- Manage an entire project cycle
- Establish realistic schedules and budgets
- Acquire, deploy, and monitor resources
- Identify and assess risks
- Make strategic and ethical decisions
- Manage changing scope, costs, timelines, and workflow
- Negotiate and oversee contracts
- Lead people and teams to excellence
- Implement conflict resolution techniques
- Monitor project status
- Assess, evaluate, and continuously improve processes
