

Master New Skills, Transform Healthcare  
**INTRODUCING HEALTH INFORMATICS**  
FROM A TOP-TIER MEDICAL SCHOOL

## NEW! Graduate Programs in **Health Informatics** – 100% Online

**L**ead the transformation of healthcare delivery with new in-demand credentials from the University of South Florida's Morsani College of Medicine. In just six months to a year – from wherever you live – you can get the skills you need to usher in the digital age of healthcare, from the university redefining healthcare. USF has the only medical school in the country offering online graduate programs in health informatics, the science of creating and managing shareable electronic health records.

Health informatics specialists facilitate better collaboration among a patient's healthcare providers so they can better manage costs and make more insightful medical decisions, ultimately leading to better patient outcomes. Tremendous growth is expected in this field, as healthcare providers scramble to comply with government mandates to create electronic medical records by 2014. Now you can be in the first generation of professionals trained in this new, in-demand field!

### Why USF Health Online?

- NO CAMPUS ATTENDANCE
- CLASSES START EVERY 8 WEEKS
- NO GRE, GMAT OR MAT REQUIRED
- FINANCIAL AID AVAILABLE
