On1 Global Launches On1Cap Program to Unlock Liquidity and Enable Continuity Across the Global Middle Market and Real Economy

Austin, TX — [On1 Global](#), a fifth-generation private enterprise specializing in economic continuity and net reserve strategies, announces the formal launch of the **On1Cap Program**, a strategic collaboration with independent financial institutions. The program is designed to meet the rising demand for capital formation, liquidity access, and succession planning across the **global middle market and real economy**, as the world undergoes the largest intergenerational transfer of private wealth in history.

According to [Cerulli Associates](#), over **\$84 trillion** in wealth is projected to change hands through 2045 in the United States alone, with more than **\$72 trillion** expected to pass directly to heirs and nearly **\$12 trillion** directed toward philanthropic causes. This shift is placing unprecedented pressure on business owners, fiduciaries, and asset holders to ensure financial continuity, optimize capital structures, and plan for succession with institutional rigor.

The On1Cap Program delivers tailored, institutional-grade solutions that support families, founders, and privately held enterprises in unlocking capital, stabilizing ownership, and preparing for generational continuity.

Operating under On1 Global's enterprise platform, the On1Cap Program integrates the proven track records of independent specialists in private credit, equity structuring, and strategic advisory. Participating institutions will work jointly to deliver customized financing strategies, capital syndication structures, and investment banking services across global markets.

"This is not a generic capital solution," said **Michael Nguyen**, Executive Director of Economic Strategy at On1 Global. *"This is structured execution, built for capital readiness, ownership transition, and operational continuity, especially as the generational transition moves from optional planning to critical financial decisions."*

The On1Cap Program is actively onboarding global partners aligned with long-term value creation, succession preparedness, and liquidity optimization, supporting enterprises and families navigating the complex dynamics of legacy transfer, governance, and growth.

The program also operates as a strategic extension of **On1GWT**, On1 Global's flagship platform designed for advisors, enterprise stakeholders, and families managing the intergenerational migration of assets. Together, these initiatives provide integrated access to liquidity planning, recapitalization, strategic exits, and value preservation across one of the most consequential economic shifts of our time.

The Great Wealth Transfer is no longer a future projection; it is actively reshaping the economic landscape. Today's stakeholders demand partners who can convert complexity into actionable, strategic outcomes. The On1Cap Program was purpose-built to meet that charter.

Transforming the Great Wealth Transfer into enduring enterprise value.
