Announcement of Hair Growth Tonic Policy

We are excited to share important information regarding our Nano Hair Growth Tonic and its usage guidelines. Our commitment to providing effective hair growth solutions is paramount, and we want to ensure that our customers understand the specific conditions under which our product can be most beneficial.

Our Nano Hair Growth Tonic is guaranteed only for clients who possess original natural hair follicles. This guarantee is based on extensive research and evidence indicating that our tonic effectively promotes hair growth specifically on natural follicles.

The reason for this policy stems from our findings related to clients who have undergone hair transplants. We have observed that:

Hair Transplant Limitations: Clients with transplanted hair often experience a significant limitation in the longevity of their results. Specifically, it has been noted that transplanted hair typically does not sustain growth beyond six years.

Effectiveness of the Tonic: Our Nano Hair Growth Tonic is formulated to stimulate and nourish natural hair follicles, promoting healthy growth cycles. However, when applied to transplanted hair, the tonic may not yield the desired results due to the inherent differences between natural and transplanted follicles.

In light of these findings, we will not be selling our Nano Hair Growth Tonic to clients who have had hair transplants. We believe this policy ensures that our customers receive the most effective treatment possible, tailored specifically for their unique needs.

Thank you for your understanding and support as we strive to provide high-quality products that promote healthy hair growth.

Best regards,

KOH KOK LEONG
Operation Manager
