## 6000A, integrated amplifier

Jul. 2019	Square Mile Magazine (London)		<p>➤ "In simple terms, 6000A is a fantastic piece of equipment for the price. The price won't put off people looking to upgrade their home audio setup to get the best out of vinyl and to offer the kind of versatility that'll render cheap portable speakers and home cinema systems alike all but useless; but it's enough to suggest, as is the case, a high level of engineering and an aspirational bit of kit. For the punch, power, clarity and richness of sound it provides, even with merely decent speakers, it's a steal"</p> <p><a href="https://squaremile.com/gear/audiolab-6000a/">https://squaremile.com/gear/audiolab-6000a/</a></p>
Mar. 2019	WEKA Media Publishing GmbH - Golden Ear 2019 (amplifier category below 2000€)		<p>➤ "Once a year, the "Golden Ear" prize is awarded by the professional magazines AUDIO and stereoplay. Readers vote on the best audio product in various categories."</p> <p><a href="https://iaggroup.jianguoyun.com/p/DVDBzx4Q2qS1BhjyqQB">https://iaggroup.jianguoyun.com/p/DVDBzx4Q2qS1BhjyqQB</a></p>
Feb. 2019	Hi-Fi News - Outstanding Products		<p>➤ "The new 6000A really is a great value modern integrated... the build and finish are first-rate. Indeed, this is just what attracted those '80s and '90s buyers to Audiolab's original 8000A, all those years ago. And so the legend lives on..."</p> <p><a href="https://iaggroup.jianguoyun.com/p/DUuQmQsQ2qS1Bhjv6AB">https://iaggroup.jianguoyun.com/p/DUuQmQsQ2qS1Bhjv6AB</a></p>
Feb. 2019	Hi-Fi Choice - Group Test Winner		<p>➤ "Tough competition for Audiolab 6000A in the latest Hi-Fi Choice integrated amplifier group test."</p> <p><a href="https://iaggroup.jianguoyun.com/p/DWxxwmQQ2qS1BhiQ7qAB">https://iaggroup.jianguoyun.com/p/DWxxwmQQ2qS1BhiQ7qAB</a></p>
Feb. 2019	Hi-Fi World - 5 Globes Outstanding Amongst The Best		<p>➤ "A superb performer - one of the best amplifiers you can buy at this price. As amplifiers go you'll be hard pressed to beat this Audiolab for its versatility - but most importantly its sound quality."</p> <p><a href="https://iaggroup.jianguoyun.com/p/DRQ24V8Q2qS1Bhj6rJUB">https://iaggroup.jianguoyun.com/p/DRQ24V8Q2qS1Bhj6rJUB</a></p>
Feb. 2019	Hi-Fi Choice - Group Test Winner		<p>➤ "The 6000A is exceptionally well made too. Everything feels immaculately assembled and finished to a high standard while details like the clear and easy to read display are very welcome... impressive sonic performance; excellent feature set and build. A brilliant integrated that delivers all the basics with useful extra features.</p> <p>Other competitors:                      Cambridge CXA80 4-Star                      MF Mssi 4.5-Star                      NAD D3045 4-Star                      Rega Brio 4.5-Star                      Yamaha R-N803d 4.5-Star*</p> <p><a href="https://iaggroup.jianguoyun.com/p/DQ8Ex2sQ2qS1BhjQmZoB">https://iaggroup.jianguoyun.com/p/DQ8Ex2sQ2qS1BhjQmZoB</a></p>
Jan. 2019	Hi-Fi Choice - Editor's Choice		<p>➤ "Just the right amount of facilities, a snappy and engaging sound, sufficient power and fine build. A great buy for the modern music fan who wants plenty of flexibility... this brilliant integrated does it all."</p> <p><a href="https://iaggroup.jianguoyun.com/p/DfibWZ0Q2qS1Bhi8g4k8">https://iaggroup.jianguoyun.com/p/DfibWZ0Q2qS1Bhi8g4k8</a></p>

6000A, integrated amplifier

- Nov. 2018

lite Das Lifestyle & Technik Magazin ➤ "The 6000A from Audiolab can already call itself almost unrivalled with its outstanding qualities in all respects. Its outstanding price-performance ratio finally makes it a hot tip in the upper middle class. As known from the traditional British company, flawless design, best material quality and an outstanding sound go hand in hand here as well. So you don't want to give the 6000A out of the same..."

- Outstanding (middle class category)

 <https://www.lite-magazin.de/2018/11/test-audiolab-6000a-der-verstaerker-mit-sinn-fuer-die-feinen-details/>
- Nov. 2018

Hi-Fi Choice ➤ "The company is well regarded for its DACs and traditional components and the arrival of the new 6000 Series shows it hasn't forgotten its roots."

 <https://www.hifichoice.co.uk/news/article/audiolab-unveils-6000-series-and-m-dac-nano/26662/>
- Nov. 2018

AUDIO.de Magazine ➤ "There is an enormous amount of sensible integrated amplifier equipment here, contemporary, easy to understand - but also good sounding... We immediately fell in love with its musicality."

- Recommended (price, performance)

 <https://aggroup.jianguoyun.com/p/DRmICDQq2qS1BhjI3Hg>
- Sep. 2018

WHF - 5 Stars ➤ "A hugely capable stereo amplifier... clear, refined and articulate sound... big, spacious presentation."

 <https://www.whathifi.com/reviews/audiolab-6000a>

6000CDT, CD transport

- Feb. 2020

Audio Cinema Em Casa (Portugal) ➤ "This is a transport that shows in a very evident way that the CD is still a great format, and it is exactly equipment like this we need. That Audiolab get sell it at this price is that it's a real miracle that I expect many of audio readers have opportunity to enjoy."

 <https://aggroup.jianguoyun.com/p/DV0KG0wQ2qS1BhiL698C>
- Jan. 2020

Hi-Fi Choice - Yearbook 2019 ➤ "The Audiolab 6000CDT is a CD transport bargain – a true quality item at a price that often doesn't buy you very much of anything. Everything from its look and feel to the way it plays compact discs is worthy of respect."

 <https://aggroup.jianguoyun.com/p/DcJFvWQ2qS1BhjJmOC>
- Jan. 2020

Sound Stage Network ➤ "It looks and feels like a component that costs twice, maybe even thrice the price... If you're one of the rare audiophiles still in the market for a CD transport and looking for the perfect aesthetic match for your existing or future Audiolab purchases -- or if you just want a well-made, attractive-looking CD transport to mate with pretty much any DAC -- don't hesitate to buy a 6000CDT. At the price, it's a very good value."

 <https://www.soundstageaccess.com/index.php/equipment-reviews/1022>
- Oct. 2018

stereonet ➤ "Extremely robust and reliable, it uses a read-ahead digital buffer to reduce disc-reading failures. Audiolab tells us that it is even able to play scratched and damaged CDs that are unreadable by conventional mechanisms."

 <https://www.stereonet.co.uk/news/audiolab-adds-6000cdt-cd-transport-to-range>
- Feb. 2019

Hi-Fi Choice - Recommended ➤ "The Audiolab 6000CDT is a CD transport bargain – a true quality item at a price that often doesn't buy you very much of anything. Everything from its look and feel to the way it plays compact discs is worthy of respect."

M-DAC nano, analogue converter

Mar. 2020	Hi-Fi Trends  The journal of accessible hi-fi	➤ <i>“Audiolab M-DAC nano with its glossy top/bottom and aluminum frame looks like a luxury timepiece. It’s like the Rolex of DAC Amps... conventional wisdom would tell you that a wired DAC should sound better than a wireless one, but this portable DAC/Headphone Amp turns that assumption on its head. It sounds every bit as good as a wired DAC/Amp at its price point, which is crazy. I haven’t heard another Bluetooth DAC that sounds quite as good.”</i> <a href="https://bit.ly/MDACnano-hifitrends">https://bit.ly/MDACnano-hifitrends</a>
Feb. 2020	Trusted Reviews - Highly Recommended 	➤ <i>“A superb portable DAC that offers performance and convenience in equal measure... simply put, it’s the most talented DAC of its type that we’ve tested.”</i> <a href="https://www.trustedreviews.com/reviews/audiolab-m-dac-nano">https://www.trustedreviews.com/reviews/audiolab-m-dac-nano</a>
Nov. 2019	What Hi-Fi? Magazine - Best DAC £100-£200 	➤ <i>“For improving your sound on the go, nothing at the price is so convenient yet capable.”</i> <a href="https://iaggroup.jianguoyun.com/p/DfrDJ40Q2qS1Bhimz5wC">https://iaggroup.jianguoyun.com/p/DfrDJ40Q2qS1Bhimz5wC</a>
Nov. 2019	Telecom Handel (DE) 	➤ <i>“With the M-DAC nano, the manufacturer promises Audiolab hi-fi sound via Bluetooth even on high-impedance headphones... The device supports all major standards and codecs such as aptX, aptX LL and AAC. So you do not have to worry about massive loss of music when transferring the music to the headphones...”</i> <a href="https://www.telecom-handel.de/consumer-communications/sound/power-headsets-audiolab-m-dac-nano-im-test-2136921.html">https://www.telecom-handel.de/consumer-communications/sound/power-headsets-audiolab-m-dac-nano-im-test-2136921.html</a>
Nov. 2019	Mighty Gadget (UK) 	➤ <i>During my test, the M-DAC Nano performs as advertised, I was quite sceptical about the improved quality of sound, but I feel like it did. Or at least it tweaked the audio profile to my tastes... From what I can tell, there is no other product directly competing with this on the market... in the world of audio, this is barely touching the sides. Nearly all other portable (though much larger and wired) DACs cost considerably more than this, so relatively, it is quite affordable. It feels like a very niche product, but with more and more people using mobiles for music, I can see the appeal. For audiophile commuters, which I am sure there are plenty of in London and other major cities, this is a great investment that can make your commute a little more enjoyable in the morning.</i> <a href="https://mightygadget.co.uk/audiolab-m-dac-nano-review/">https://mightygadget.co.uk/audiolab-m-dac-nano-review/</a>
Dec. 2019	TechRadar Online Publication 	➤ <i>“The best external DACs to replace your phone’s awful amp... don’t be mistaken by the M-DAC Nano’s diminutive stature – this is a powerful, pocketable piece of audio excellence.”</i> <a href="https://www.techradar.com/uk/news/phone-and-communications/mobile-phones/ff-iphone-7-ditches-the-audio-jack-these-three-dacs-will-keep-the-music-spinning-1321629">https://www.techradar.com/uk/news/phone-and-communications/mobile-phones/ff-iphone-7-ditches-the-audio-jack-these-three-dacs-will-keep-the-music-spinning-1321629</a>
Nov. 2019	The Times Magazine 	➤ <i>“5 reasons why we love Audiolab M-DAC Nano... from Simon Hills’ brilliant men’s style section of The Times Magazine.”</i> <a href="https://iaggroup.jianguoyun.com/p/Df0f4WkQ2qS1BhiZ0pwC">https://iaggroup.jianguoyun.com/p/Df0f4WkQ2qS1BhiZ0pwC</a>
Oct. 2019	What Hi-Fi? - AWARDS 2019 	➤ <i>“Best DAC £100-£200. A great way to improve the sound of your phone or laptop”</i> <a href="https://www.whathifi.com/awards/best-dacs-2019">https://www.whathifi.com/awards/best-dacs-2019</a>

| Oct. 2019 | Experten-Beraten.de (Germany)<br>                   | ➤ <i>"The processing and the design of the M-DAC Nano by audiolab are so noble, that there is nothing to complain about. The most important thing, however, is the sound, which is improved a lot by this small device. Even small details become much more audible with the M-DAC Nano and provide even more listening pleasure. Another great thing is that you get a bit more flexible: It is still possible to carry cable headphones, but you are not so limited by the cable, because they can be worn anywhere on the body due to the clip pocket, as they are via Bluetooth with the Mobile are connected. So if you do not like pure Bluetooth headphones, get with the mini headphone amplifier M-DAC Nano from audiolab a great alternative or compromise solution."</i><br><a href="https://www.experten-beraten.de/test/mini-kopfhoererverstaerker-m-dac-nano-von-audiolab/">https://www.experten-beraten.de/test/mini-kopfhoererverstaerker-m-dac-nano-von-audiolab/</a> |

| Aug. 2019 | Stereo & Video Magazine (Czech) - Recommended<br> | ➤ <i>"Sound with well-controlled bass... the signal can be clearly resampling to the 384 kHz/32-bit while recorded music is still gaining transparency, drawing the finest details and, last but not least enhances the dynamics of recordings."</i><br><a href="https://iaggroup.jianguoyun.com/p/DalRF2gQ2qS1BhigsecB">https://iaggroup.jianguoyun.com/p/DalRF2gQ2qS1BhigsecB</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Jul. 2019 | Forbes Media<br>                                  | ➤ <i>"AudioLab has designed and engineered the M-DAC Nano in the UK and they've made a great job of it. The sound quality is excellent without any of the background hiss of some Bluetooth receivers. The upscaling enhanced mode really works, although I found the standard mode to be perfectly adequate. Support for aptX and AAC is great. All in all, a great little device that provides superb wireless audio on the move."</i><br><a href="https://www.forbes.com/sites/marksparrow/2019/07/02/audiolabs-m-dac-nano-puts-wireless-audiophile-sound-in-your-shirt-pocket/?ss=consumertech#202b1231358b">https://www.forbes.com/sites/marksparrow/2019/07/02/audiolabs-m-dac-nano-puts-wireless-audiophile-sound-in-your-shirt-pocket/?ss=consumertech#202b1231358b</a>                                                                                                                                                                                                        |
| Jul. 2019 | Q Magazine (UK)<br>                               | ➤ <i>"I'm so blessed. This portable digital-to-analogue converter will vastly improve the sound of your laptop or phone. It's easy to use not just for people who stand around in hi-fi shops talking about speaker impedance - it will fix audio that you didn't realise needed fixing."</i><br><a href="https://iaggroup.jianguoyun.com/p/DfsfjbQQ2qS1Bhicz9oB">https://iaggroup.jianguoyun.com/p/DfsfjbQQ2qS1Bhicz9oB</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

M-DAC nano, analogue converter

- Jun. 2019

Maclife Publication

➤ "The fact that the current iPhone models do not have a headphone output still weighs heavily on many music fans. The Audiolab M-DAC Nano ports the beloved wired over or in-ear into the digital age and improves the audio quality even further in contrast to simple adapters."

- May. 2019

What Hi-Fi? - 5 Stars

➤ "A great way to improve the sound of your phone or laptop. We can't think of a better alternative for portable use."

<https://www.whathifi.com/reviews/audiolab-m-dac-nano>
- May. 2019

Hi-Fi Choice - Recommended

➤ "AUDIOLAB'S M-DAC SERIES has expanded over the years to cover a variety of roles... the M-DAC Nano has an extremely impressive level of engineering integrity."

- Apr. 2019

Stuff Magazine

➤ "One of the smallest DACs we've seen... an audiophile must-have."

<https://iaggroup.jianguoyun.com/p/DRDA4GQQ2qS1Bhix2LgB>
- Apr. 2019

The Sun On Sunday

➤ "Gadget of the week... It turns corded cans into Bluetooth ones – extra handy for iPhone users... Small but [delivers] big sound upgrade."

<https://iaggroup.jianguoyun.com/p/DeZ-xqEQ2qS1BhiT2LgB>
- Apr. 2019

Avforums - Recommended

➤ "The diminutive Bluetooth headphone amp earns a collection of excellent scores across the various review criteria, ranging from 8/10 to 9/10 and culminating in a Recommended Award. Meet the best surrogate headphone amp socket... this is a great Bluetooth amp with a quality and care of implementation and user-friendliness that really shines through... a truly well thought out and implemented product... the Audiolab sounds very, very good."

lite Das Lifestyle & Technik Magazin - Outstanding (middle class category)

➤ "The Audiolab M-DAC nano is a cute little wonder box. Its multiple uses allow you to operate high-quality, wired headphones without having to change your smartphone. As a headphone amplifier, he performs first-class work.... it makes even older amplifiers Bluetooth compatible. Now, for example, the visitor can also stream music to the system.... sonically, the Audiolab is definitely a significant asset."

- Mar. 2019

T3 Magazine

➤ "The best ultra-portable DAC."

<https://www.t3.com/features/best-portable-dac>
- Jan. 2019

TED Publications

➤ "The M-EAR 4D give way to music, regardless of the environment. The oversampling function of the M-DAC nano is particularly effective in restoring the atmosphere and frequencies lost when listening to compressed files. Audiolab has won its bet of offering quality products, well made, pleasant to use and whose sound quality is asserted. The pairing will become indispensable for the audiophile On The Go."
