- o **Contact:** being subjected to harmful online interaction with other users
- Conduct: personal online behaviour that increases the likelihood of, or causes, harm.

The online world develops changes at a great speed. New opportunities, challanges and risks are appearing all the time. This can make it difficult for schools to stay up to date with the latest devices, platforms, apps, trends | and related threats. It is therefore important to focus on the underpinning knowledge and behaviours that can help pupils to navigate the online world safely and confidently regardless of the device, platform or app. Teaching this includes 5 main areas:

- How to evaluate what they see online enabling the pupils to make judgements about what they see online and not assume it is always true.
- How to recognise techniques used for persuasion enabling children to recognise persuasive techniques used to manipulate others and to understand a strong grasp of knowledge across many areas makes them less vulnerable
- Online behaviour to help them understand what is acceptable and unacceptable behaviour online and what it looks like
- **How to identify online risks** enables them to identify possible online risks and to then make informed decisions about how to act.
- **How and when to seek support** this allows pupils to understand safe ways in which to seek support if they are worried or upset about something online
- The school will support learners to read and understand the acceptable use policies in a way which suits their age and ability by:
