Delivering accurate traffic and transport data across the UK
about

Intelligent Data is one of the largest major independent providers of traffic survey data in the UK and EU. Intelligent Data has consistently delivered quality data in a comprehensive, economical and efficient manner in partnership with transport modelling teams in the public and private sector across the UK.
Intelligent Data has unrivalled experience in data collection, analysis and presentation of several thousand projects annually across multiple thousands of individual sites with varying degrees of complexity delivered on all road types across the UK.

Intelligent Data holds ISO9001, 14001, 27001, 45001 and is ICO and GDPR compliant for all works that are undertaken.
