

## REPLACEMENT SHUTTER SOURCE

When we needed to replace a couple rotted shutters, we chose shuttercontractor.com. They provided custom-made plastic shutters that were an exact match, in both size and pattern, for our shutters.

For \$5, they first provided a set of 16 color matching plastic tabs, so that we could choose the color closest to our existing shutter color. (The \$5 is credited if you order.) The shutters were an exact color match to our original color. They are also paintable.

They are not cheap; seems to me we paid about \$110 for two shutters, but they are custom made and they look great. I recommend them. If you'd like to borrow my set of color samples, I am happy to lend. If you'd like to see what they look like, give me a ring and come over.
