OUR COMMITMENT

From the very beginning, we've been committed to being there for you

QUALITY CRAFTSMANSHIP

Each Mule that passes through our doors has been created right here in the United States by skilled craftsmen. By sourcing quality components, taking an honest pride in quality workmanship, and being dedicated to innovation, we are pleased to offer you a product that is truly unique in its capabilities.

RUGGEDLY RELIABLE EQUIPMENT

We know that you work hard, so you need equipment that works just as hard as you do. And at the end of the day, you need something you can depend on. We are committed to providing you with equipment that will stand the test of the challenges you face every day, and save you a lot of stress.

CUTTING-EDGE TECHNOLOGY

Our Research and Development Team listens to what you say and is always hard at work behind the scenes, creating innovative solutions to solve the problems you face. We've done it again in developing the all-new hydraulic pilot operated drive control system featured on the 7040, enhancing reliability and providing increased operator feedback

With a business based out of Paris, Tennessee, Noah Swarey has less than two hours to Cardinal's home office and has purchased and picked up all his Mules directly from there. "My experience with Cardinal has been very positive. I would definitely give them an A+ rating."

Noah's first Mule was a Mule 4, purchased in 2014. It wasn't long until his small shed-hauling business, that now covers all of west Tennessee north of Interstate 40, was ready to add a second truck, so he added a Mule 3, and soon upgraded to a Mule 5.

When the track machines were introduced, Swareys LLC first rented a Mule 624T from Cardinal Leasing for a few months to try it out and later purchased two 628T's. "With the track Mule," Noah says, "we can go out in pretty much any type of weather and generally the only limiting factor is the customer." Instead of trying to discern if it's dry enough, Noah knows that his Mule 628T can handle even extremely difficult deliveries. "It has taken the limiting factor off us and put it on the customer. I am very happy and satisfied with the Mules."

Thank you, Noah, for trusting us for your delivery solutions.

AN EXCEPTIONAL KNOWLEDGEABLE TEAM

We are dedicated to the industry we serve. That means our professional and friendly Sales Team is well-educated and experienced with our products, and our highly-acclaimed Technical Support Team is here to answer your service questions, assist with troubleshooting, and even provide 24 hour emergency technical assistance.

SERVICE THAT STANDS OUT

We realize that service is just as important as innovation. That's why we've developed a growing network of certified Service Centers across North America that work alongside our technicians to service and maintain your Mule, as well as keeping parts in stock. And any time you call our office, you'll speak to a real person right away. We're at your service.

A REPUTATION BEYOND COMPARE

We care about you, and that's earned us a reputation we're proud of. We are committed to continuing to provide you with equipment you can rely on, service that goes the extra mile, and innovation that's at the leading edge. Our equipment works hard so you don't need to.

HI THERE!

Tired of stressful shed deliveries? We're right there with you! In fact, we're so passionate about making your job easier, we've developed a whole family of Mules that will pull the workload for you.

Whether you're looking for rugged reliability or cutting-edge innovation, we have the Mule for you. Want to make it even easier? How about running your day via our wireless remote control! Let us empower you to take charge.

All-new this year is another record-breaking Mule – the 7040. This Mule will power through building sets like nothing ever before with its 40 HP EFI Vanguard engine, 12,000 lb. of lifting capacity, and 119,000 in. lb. of axle torque. But keep in mind that all this is still contained in an

impressively neat package of only 70 1/4" in height, 44 1/2" in width, and 73 3/4" in length. And be sure to check out the vast array of options should you decide to upgrade to the Mule 7040R.

If you're only moving small garden sheds or chicken coops, we still offer the perpetually popular Mule 413. Or for the wireless remote control option, choose the Mule 524 wheel machine or Mule 628T track machine fitted with electronic controls and an on-board diagnostic screen.

Our friendly, helpful team is happy to discuss your options and see which Mule will best fit your needs.

MULE 413

Offering a history of reliability and efficiency, the Mule 413 is powered by a 13HP Honda engine producing 44,000 in. lb. of axle torque. Modeled after the original Mule 4HD, the Mule 413 boasts a number of upgrades, such as heavy-duty permanently-lubricated mast tilt bushings, a no-drift tail-wheel cylinder, latch-in easily removable rear hood, and the new arched mast arms for maximum maneuverability.

MULE 413

Popular Options

1. Fluid-Filled or Foam-Filled Drive Tires

3. LED Work/Strobe Lights (3 Ct.)

4. Toolbox with bracket

"A Mule has allowed us to put buildings in places that in years past we would not have been able to without doing a build on-site because you just physically weren't able to push them in on pipes and rollers."

"Our experience with Cardinal has been nothing but outstanding. They are one of the few companies operating today that are truly a pleasure for us to deal with."

— Alfred | Taylor Structures LLC, PA

MULE 524

If you're looking for a wheeled Mule with modern technology, you'll be happy to meet the Mule 524. With features such as High Torque Drive Hubs, Automatic Tracking, On Board Diagnostics, not to mentioned the all-new Arched Mast Arms, the Mule 524 will take you – and your shed – where you need to go. All of the options that you have come to enjoy, such as the Wireless Remote Control, Toolboxes, LED Work Lights, Tire Ballast, Foam-Filled Tires, and EZ Stow Dollies are available on this Mule as well. Powered by a 24HP Honda engine and with more than 97,000 in. lb. of axle torque, the Mule 524 is the most powerful wheeled shed mover on the market.

MULE 524

Popular Options

1. Wireless Remote Control
2. EZ Stow Aluminum Dollies
3. LED Work/Strobe Lights (3 Ct.)
4. Toolbox with bracket

"The versatility of having a Mule is pivotal to the success of our company. Our company does anything from small sheds to large tiny homes and cabins, and having the versatility of different size Mules helps us accomplish the work at hand."

– Corey | Cabin Connections, KY

MULE 628T

This is where modern technology meets rugged reliability and practical solutions. With its Electronically-Controlled, Fuel-Injected 28HP Honda engine and 119,000 in. lb. of axle torque, the Mule 628T will provide you with even more power for rugged terrain and difficult sets. In addition, the Mule 628T features three automatic electronic throttle control modes, as well as the recently developed flip-up dashboard and latch-in front hood, making it easier to service your engine. Need more? The Mule 628T-HD with its 10,000 pounds of lifting capacity will make short work of the shed deliveries that used to leave you sweating.

MULE 628T

Popular Options

1. 10,000 lb. Lifting Capacity
2. Wireless Remote Control
3. LED Work/Strobe Lights (3 Ct.)
4. Toolbox with bracket

"The Mule basically makes it possible for us to deliver. We run semis and a semi will get stuck or tear up a yard, but with the Mule, we can actually get the job done."

"What's really been good with the track machines is that it works even in rocky stuff, and later that day you might be in a sandy area, so it's very valuable for going from rock to sand to mountains."

– Caleb | CM Construction, TX

New for 2024

MULE 7040R

Electronic and Mechanical Hydraulic Controls

Recessed On-Board Diagnostic Screen

External Air Cleaner

Hydraulic Pilot Drive Controls

Latest generation 40 HP EFI Vanguard engine

E-Throttle

Available with Wireless Remote Control

Shock-Absorbing Step Plate Operator Station

MULE 7040

"Our terrain around here in northeast Pennsylvania is very hilly, and obviously we have the wet spring and fall months, and after getting used to the tracks, that was just a game-changer. "We're in a rural area where it's pretty open, but at the same time, we're close enough to some smaller cities so we do get into areas where the houses are closer together and you can't get a truck and trailer into their back yard so the Mule has been wonderful for dealing with that, and also being able to walk around while placing the structure has made it much safer while keeping the disturbance to a customer's property to a bare minimum. This helps make it a much better experience for the customer all around."

—Corey | Taylor Structures LLC, PA

MULE 7040/7040R

We are thrilled to introduce the Mule you've been asking for. With an unprecedented 12,000 lb. lift capacity and the latest generation 40 HP EFI Vanguard engine the Mule 7040 is so much more than just an upgraded Mule 737T. With hydraulic pilot drive controls, the Mule 7040 is ready to tackle your most difficult shed deliveries. But what really sets it apart is that it is available either with mechanical hydraulic controls (the standard Mule 7040), or as a fully mechanically and electronically-controlled machine (the Mule 7040R) with popular features like the E-throttle or Wireless Remote Control. This Mule was engineered with you in mind.

MULE 7040/7040R

Popular Options

1. Wireless Remote Control (*available on Mule 7040R only*)
2. LED Work/Strobe Lights (3 Ct.)
3. Toolbox with bracket
4. Mule Carriage (sold separately)

"The track Mule has made it even better. I love it. It's a totally different machine than the 4's, but once I got used to the electronics, it's just as smooth. We couldn't do what we're doing without the Mules."
 – Johnny, Jr. | Dakota Shed Haulers, SD

“When we went to Mules, the customers’ expectations changed and now they expect us not to have any lawn damage. The Mules have helped us to get buildings into people’s yards even after an inch of rain if there’s established grass with minimal to no lawn damage. It would be impossible for us to deliver without a Mule. They’re a must-have.”

–Derek | Dakota Shed Haulers, SD

“Anytime I reach out to them, someone’s happy to get me an answer as quickly as possible and everyone I’ve spoken with has been superb at getting my questions answered. They are on the ball immediately. I could not recommend them more highly.”

"With a Mule, we changed from delivering two buildings a day to six buildings a day. And it's so much easier than trying to get the truck and trailer off the road."

"The biggest challenge we face is mud, because in the spring we have so much rain. And that's where the track machine comes in handy. I can actually put buildings in the yard when it's wet. You can just do so much more. Not to mention everybody wants to video the 628T remote-controlled robot that I put buildings in their yard with. It's more popular than the local movie star.

"Cardinal as a company has been beyond helpful. They get a 5 star out of 5 from me."

—JD | Perry's Transport, OK

MULE CARRIAGE

Use our popular Carriage option to transport any model Mule. In addition to a secure method of transport, it also provides fast and easy loading and unloading of your Mule and Dollies. With hydraulic drive power, all movement when loading and unloading is fully controlled, even when parking on slopes and uneven terrain.

FORKLIFT BARN MOVER

The Forklift Barn Mover makes a great pair with Crank-Up Dollies for moving buildings out of your shop, or rearranging a lot with a forklift. It works with both center skid and no center skid floor designs, and requires only 3.5" clearance to attach. The Forklift Barn Mover easily slides on and off your forklift forks, and comes standard with a retaining chain to prevent it from sliding off when in use.

CRANK-UP DOLLIES

These dollies are the perfect solution for moving buildings out of your shop or rearranging buildings on your lot. They require no additional lifting device to use. Simply slide underneath building and use the crank handle to lift your building to the desired transport height. The tires are the same heavy-duty 8-ply as used on the regular barn dollies. Hooks are available for 4x4, 4x6, or 6x6 skids.

TAKE CONTROL

Give your business the boost it needs with new equipment financed through Cardinal Leasing. With flexible finance, rent, or lease to purchase options, you'll be able to grow your business with the latest technology while keeping your overhead low. Contact us today to see how these great programs can be put to work for you.

"It's about a must, especially where you're dealing with Eastern Kentucky terrain. A good 80% of what we do, if not more, we always use a Mule. So it's definitely a much-needed piece of equipment for us.

"Cardinal has been very good to work with. Very good people, putting their customers first."

—Cole | Cabin Connections, KY
