

Our Mules Deliver™

Take charge

Tired of stressful shed deliveries? We're right there with you! In fact, we're so passionate about making your job easier, we've developed a whole family of Mules that will pull the workload for you.

Whether you're looking for rugged reliability or cutting-edge innovation, we have the Mule for you. Want to make it even easier? How about running your day via our wireless remote control! Let us empower you to take charge.

Mule 413

Offering history of reliability and efficiency, the Mule 413 is powered by a 13HP Honda engine producing 44,000 in. lb. of axle torque. Modeled after the original Mule 4HD, the Mule 413 boasts a number of upgrades, such as a heavy-duty permanently-lubricated mast tilt bushings, no-drift tail-wheel cylinder, operator protection side-guards, latch-in easily removable rear hood, and the new arched mast arms for maximum maneuverability.

Mule 413

Popular Mule 413 Options

1. Fluid-Filled or Foam-Filled Drive Tires
2. EZ Stow Aluminum Dollies
3. LED Work Lights (3 Ct.)
4. Toolbox with bracket

Mule 524

If you're looking for a wheeled Mule with modern technology, you'll be happy to meet the Mule 524. With features such as High Torque Drive Hubs, Automatic Tracking, On Board Diagnostics, not to mention the all-new Arched Mast Arms, the Mule 524 will take you – and your shed – where you need to go. All of the options that you have come to enjoy, such as the Wireless Remote Control, Toolboxes, LED Work Lights, Tire Ballast, Foam-Filled Tires, and EZ Stow Dollies are available on this Mule as well. Powered by a 24HP Honda engine and with more than 97,000 in. lb. of axle torque, the Mule 524 is the most powerful wheeled shed mover on the market.

1. Wireless Remote Control
2. EZ Stow Aluminum Dollies
3. LED Work Lights (3 Ct.)
4. Toolbox with bracket

Mule 524

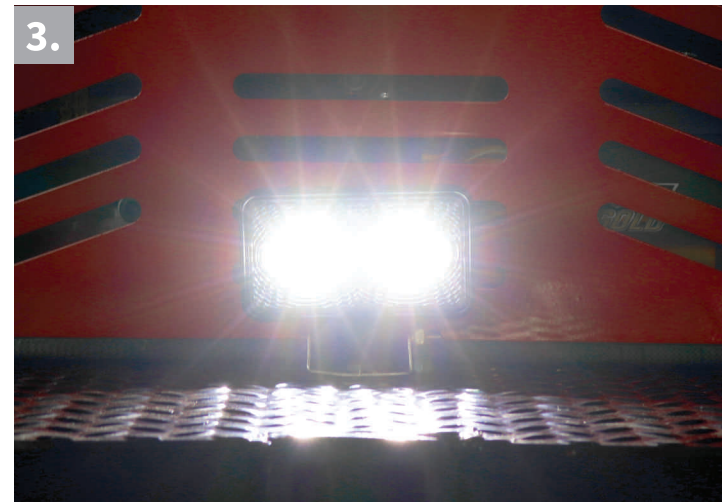

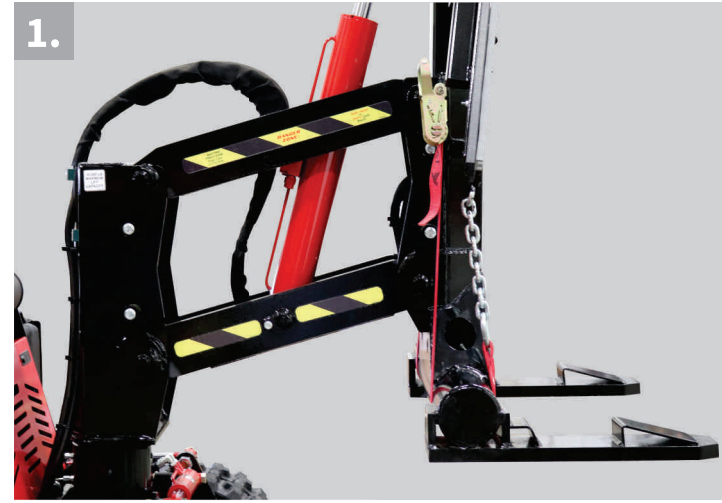

Mule 628T

This is where modern technology meets rugged reliability and practical solutions.

With its Electronically-Controlled, Fuel-Injected 28HP Honda engine and 119,000 in. lb. of axle torque, the Mule 628T will provide you with even more power for rugged terrain and difficult sets. In addition, the Mule 628T features three automatic electronic throttle control modes, as well as the recently developed flip-up dashboard and latch-in front hood, making it easier to service your engine. Need more? The Mule 628T-HD with its 10,000 pounds of lifting capacity will make short work of the shed deliveries that used to leave you sweating.

Mule 628T

Popular Mule 628T Options

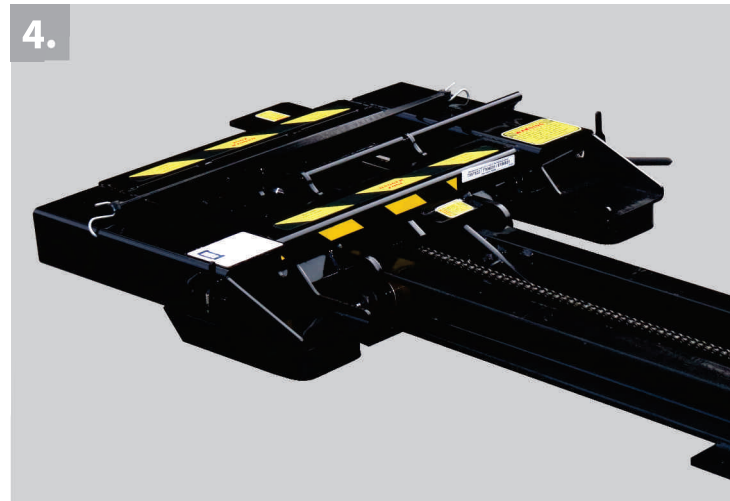

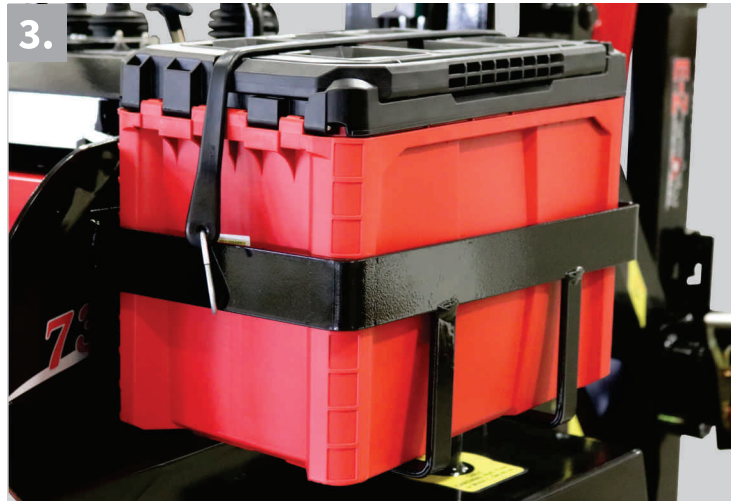

1. 10,000 lb. Lifting Capacity
2. Wireless Remote Control
3. LED Work Lights (3 Ct.)
4. Toolbox with bracket

Mule 737T

With its electronic fuel-injected 37HP Vanguard engine, the Mule 737T is our most powerful Mule. In fact, it's the most powerful Mule ever, offering 35% more engine power than the original 624T, and 25% more engine power than the 628T. With a standard 10,000 pound lifting capacity with power rotator, 119,000 in. lb. of axle torque, and 10,000 pound capacity dollies, the Mule 737T is especially equipped for the most extreme deliveries of largest sheds and cabins in the industry. The Mule 737T features our patented i-Trax technology, as well as EZ Stow Dollies and is available with our highly popular wireless remote control, as well as the LED Work Lights and Toolbox.

Mule 737T

Mule Carriage

Use our popular Carriage option to transport any model Mule. In addition to a secure method of transport, it also provides fast and easy loading and unloading of your Mule and Dollies. With hydraulic drive power, all movement when loading and unloading is fully controlled, even when parking on slopes and uneven terrain.

Forklift Barn Mover

The Forklift Barn Mover makes a great pair with Crankup Dollies for moving buildings out of your shop, or rearranging a lot with a forklift. It works with both center skid and no center skid floor designs, and requires only 3.5" clearance to attach. The Forklift Barn Mover easily slides on and off your forklift forks, and comes standard with a retaining chain to prevent it from sliding off when in use.

Crank-up Dollies

These dollies are the perfect solution for moving buildings out of your shop or rearranging buildings on your lot. They require no additional lifting device to use. Simply slide underneath building and use the crank handle to lift your building to the desired transport height. The tires are the same heavy-duty 8-ply as used on the regular barn dollies. Hooks are available for 4x4, 4x6, or 6x6 skids.

At your service

At Cardinal, we realize that service is just as important as innovation.

That's why we've developed a growing network of certified Service Centers across the United States. These Service Centers work alongside our technicians to service and maintain your Mule, as well as keeping parts in stock. And as always, our highly-acclaimed Technical Support Team is here to answer your service questions, assist with troubleshooting, and provide 24 hour emergency technical assistance. We're at your service.

Give your business the boost it needs with new equipment financed through our in-house financing company. With flexible finance, rent, or lease to purchase options, you'll be able to grow your business without breaking out of budget.
