2 in 1 Waste/Drain adaptor (Designed and kitted in Australia by an Aussie)

Fits many vans - made from PVC

Kit consists of

- 5 x 50mm lengths of pipe
- 2 x 100mm, lengths of pipe
- 1 x 90 degree elbow
- 2 x T sections
- 1 x 45 degree elbow
- 1 x clamp
- 1 x piece of flywire
- 1 x piece of tubing to join the 100mm outlet to your drain hose

**Glue not supplied.** Plumbers glue is available at all major hardware chains or plumbing supplies. Plumbers glue is a dangerous good and adds a further complexity to freight.

Before gluing, trial fit all parts, adjust the length of the 100mm centre section to suit your outlets and mark accordingly before gluing. One of the 100mm sections may not be required depending on your flexible waste pipe connection

On some vans the 2 x 50mm sections that connect to the outlets may not be required
