

POLICY

Hawk Energy, LLC has adopted this policy to inform employees of the General Waste Management Plan. This ensures the safety and health of the employees.

David Slim is responsible for ensuring that the following policy is enforced.

WASTE TYPES

- **Listed Wastes:** Wastes that EPA has determined are hazardous. The lists include the F-list (wastes from common manufacturing and industrial processes), K-list (wastes from specific industries) and P- and U-lists (wastes from commercial chemical products)
- **Characteristic Wastes:** Wastes that do not meet any of the listings above but that exhibit ignitability, corrosivity, reactivity, or toxicity
- **Universal Wastes:** Batteries, pesticides, mercury-containing equipment (e.g., thermostats) and lamps (e.g., fluorescent bulbs)
- **Mixed Wastes:** Waste that contains both radioactive and hazardous waste components
- **Construction Wastes:** Building materials such as bricks, concrete, wood, insulation, nails, electrical wiring and rebar, as well as waste originating from site preparation such as dredging materials, tree stumps and rubble. Construction waste may contain lead, asbestos, or other hazardous substances
- **Medical and Infectious Wastes:** Waste generated by health care activities includes a broad range of materials, from used needles and syringes to soil dressings, body parts, diagnostic samples, blood, chemicals, pharmaceuticals, medical devices and radioactive materials

PROCEDURES

Waste Estimation

Prior to the commencement of work, it is the policy of Hawk Energy, LLC, to ensure that an estimation of the wastes, trash and scrap materials that will be generated is conducted. This will be performed so the need for containers, and waste removal, if necessary, can be determined.

Waste Disposal

Hawk Energy, LLC will coordinate with the project or site owner to ensure the proper disposal of waste or scrap materials. Hawk Energy, LLC will ensure that the owner is aware of whether wastes and scrap materials will be taken off-site or will be disposed of on the owner's site.

Safety Hazards

Hawk Energy, LLC will ensure safe practices related to the immediate storage and handling of waste, scrap, or left-over materials are carried out. Always be aware of what you are handling. The proper Personal Protective Equipment (PPE) will be used before handling.

Handling, Organization, & Storage

Hawk Energy, LLC will ensure that waste materials will be properly stored and handled to minimize the potential for a spill or impact on the environment. During outdoor activities, receptacles will be covered to prevent the dispersion of waste materials and to control the potential for run-off.

It is the policy of Hawk Energy, LLC that all types of waste or scrap materials generated will be stored properly and in an organized fashion.

Hawk Energy, LLC ensures project-related wastes will be stored and maintained in an organized fashion to encourage proper disposal and minimize risks to employees. Proper waste receptacles will be provided for trash and materials that may be reused or recycled during a project.

Proper Methods of Disposal

Employees will be informed upon initial assignment of the proper methods of disposal, the worksite waste management procedures and changes to the waste management plan.

It is the policy of Hawk Energy, LLC to ensure all employees are instructed in the proper method to dispose of waste.

Employees of Hawk Energy, LLC will be instructed on the general disposal of non-hazardous wastes, trash, or scrap materials. If wastes generated are classified as hazardous, employees will be trained to ensure proper disposal.

Waste Segregation

Hawk Energy, LLC is committed to encouraging employees to properly segregate waste or scrap materials to ensure the opportunity for reuse or recycling.
