

## Hawk Energy, LLC

### EQUIPMENT SAFETY INFORMATION / HAZARD IDENTIFICATION

The information contained in this binder comes from the manufactures of the equipment used or owned by E&B. These sheets will be helpful in training and JSA preparation. This binder helps identify the hazards that employees may encounter through the work day. If employees encounter current types of equipment that are not covered in this binder or supervisors acquire new types of equipment, information needs to be forwarded to the safety department to be added to this binder. This binder is intended to be a comprehensive but not all inclusive list of the dangers that may be encountered.
