

# Workboat/Safety Boat Jaffa

JAFFA is a Rigidflex New Matic 360 safety/workboat operated as a rapid-response support craft for day-to-day marine operations. Compact, stable and quick to deploy, JAFFA is used for standby safety cover, man-overboard support, and short-distance crew transfer and light equipment moves around the worksite. The vessel's robust, low-maintenance design and practical open layout make it well suited to close-quarters work alongside other vessels, pontoons and structures, and the boat is built with unsinkable flotation to enhance survivability in the event of swamping or damage. JAFFA has payload of up to 560 kg.

	<b>Dimension</b>	<b>Deck Equipment</b>
