Interactive Workshops

Description: We provide specialized, workshops tailored for academia, government agencies, corporate partners, and individuals committed to a career in cybersecurity or AI. Our workshop is continuously updated to reflect the evolving threat landscape and technological advancements.

Instructions: Choose a Core Service and link the Item Number to the Instructional Design Matrix. Choose the level of interactivity associated with the Item Number. See the Legend Below for details about each level and learning outcomes.

Core Service

Item Number	Hours	Description - Custom Four-Hour Interactive Workshop
W001	4	Intro to Artificial Intellgence (AI)
W002	4	Intro Cybersecurity, Cyber policy
W003	4	Intro IT/Cybersecurity Careers
W004	4	Intro Information Technology
W005	4	Intro to Coding (Python)
W006	4	Custom Topic (Please Contact for Information)
W007	2	Additional Two Hours

Instructional Design Matrix (See Legend End of Document)

Item Number	Level 1	Level 2	Level 3
W001-4	$561	$1402	$1963
W005	$1122	$2804	$3926
W007	$100	$250	$500

Instructional Support

Description:

We partner with your team to deliver your existing cybersecurity/AI training programs that address unique organizational learning needs. This service is ideal if you have an existing program and need subject matter expertise (SME) to deliver or instruct the content.

Instructor Support Core Service

Item Number	Description
IS01	Training Delivery and Facilitation
IS02	Strategic Resource Enhancement
IS03	Program Evaluation and Improvement

Add-On Products & Services:

Item Number	Description
IS05	Tailored Instruction for Specific Roles
IS06	Cybersecurity Coaching and Mentoring
IS07	Custom Training Programs

Prewritten Courses: Licensed & Purchased

Licensed Course

Opting to purchase a licensed 6-week course ensures that your training meets industry standards and organizational requirements, providing access to expert knowledge and resources that keep your team updated with the latest cybersecurity trends.

Item Number	Description
PC01	Intro to Ethical Hacking
PC02	Intro to Artificial Intelligence
PC03	Intro to Blockchain
PC04	Intro to Internet of Things (IoT)
PC05	Cybersecurity Foundations (CTE Course)

Add-On Products & Services:

Item Number	Description	QTY	Price
PC05	Industry Certification Voucher (Ethical Hacking)	1	$1500
PC06	Industry Certification Voucher	1	$250

Licensed Course Pricing Catalog:

Item Number	Level 1	Level 2	Level 3
All Course	$1200	$2000	$3000

Purchased Course

Opting to purchase a custom 6-week course allows for full customization to meet your specific needs. You can tailor the content to align with your organization's goals, values, and the unique roles of your team members. This flexibility ensures that the training is relevant, engaging, and directly applicable to your daily operations.

Item Number	Description
PC00	Custom Course
PC01	Intro to Ethical Hacking
PC02	Intro to Artificial Intelligence
PC03	Intro to Blockchain
PC04	Intro to Internet of Things (IoT)
PC05	Cybersecurity Foundations (CTE Course)

Add-On Products & Services:

Item Number	Description	QTY	Price
PC05	Industry Certification Voucher (Ethical Hacking)	1	$1500
PC06	Industry Certification Voucher	1	$250

Purchased Course Pricing Catalog:

Item Number	Level 1	Level 2	Level 3
All Courses	$3500	$5000	$7500

Legend

In an ideal scenario, the degree of interactivity within instructional design should be a deliberate decision. The focus lies in creating engaging content that facilitates effective learning transfer. However, practical considerations in the real world often involve balancing program requirements influenced by stakeholders, available resources, and conventional practices.

- Here's a breakdown that we typically follow:
- Level 1 – Basic:
    - o This introductory level provides a foundational overview of the digital and emerging career landscape, similar to a self-paced e-learning module. It covers key concepts and terminology related to fields like AI, technology consulting, cybersecurity, and information technology.
    - o This level may include simple assessments to reinforce learning.
- Level 2 – Interactive:
    - o This level provides a deeper exploration of day-to-day work in cybersecurity roles, and other roles incorporating interactive elements.
    - o Participants engage with the content through activities like simulated "capture the flag" exercises, drag-and-drop challenges, and branching scenarios that offer a limited range of choices to guide their learning path.
- Level 3 – Advanced:
    - o This level elevates to an immersive and engaging experience, utilizing advanced e-learning design features to create a personalized journey.
    - o Participants explore various career paths, certificates, and credentials through interactive scenarios, gamified challenges, and dynamic visualizations.
    - o They can delve deeper into specific areas of interest, uncovering the skills and training required for success in those fields. This level also features certifications and credentials, allowing for personalized exploration and discovery.
