

## SERAC IS HIRING FOR A FULL SUITE OF 2024 PROJECTS

If you're a team player with a keen interest in mineral exploration and looking to advance your skill set, then we want to connect with you about joining our team for 2024.

Serac Exploration is a mineral exploration services company. We plan and execute mapping, sampling, and drilling campaigns. We also specialize in geological modelling and database management services.

To learn more about us visit our website at [www.seracx.com](http://www.seracx.com)

In 2024, we managed a range of base and precious metal projects for our clients in British Columbia, Yukon Territory, California, Nevada, and Arizona. These exploration projects ranged from early-stage surface programs to advanced ground and helicopter supported drilling campaigns.

Serac's projects typically involve being based in small towns and/or remote field camps, with rotations ranging from three to four weeks. Serac is committed to maintaining a safe, inclusive, and healthy working environment for all contractors and employees.

Some positions may involve traversing rugged terrain and/or lifting heavy objects (up to 50 lbs.)

### OUR AVAILABLE POSITIONS:

- **Project Geologist:** Experienced team leaders, assisting in planning and executing projects, and can be involved in desktop studies, reports, and geological modelling.
- **Project Coordinator:** These versatile team players assist in managing and executing our work programs, implementing policies, performing administration, onboarding employees, running schedules/budgets, and a lot more.
- **Geologist:** PGeos and GITs with a university degree that enjoy working within a team to collect data and execute other exploration program objectives.
- **Assistant Geologist / Geotech:** Earth science students and new graduates looking to gain or build on industry experience and support the geological team in running programs.
- **Exploration Assistant:** Skilled workers and university/college students that aren't necessarily geoscience focused, but have an interest or skillset tuned to mineral exploration.
- **Camp Construction and/or Maintenance:** Includes builders, tradesmen, handyman-types, site services workers, and camp managers with experience or interest in building remote camps.
- **Camp Cook:** Experienced line, bull, and lead cooks that have either worked in camps or have experience preparing daily meals for groups with varying dietary needs.
- **Camp Cleaner:** For workers that enjoy a camp atmosphere and contributing to a healthy and clean workplace, vital part of any project.

**HERE'S HOW TO APPLY:** Send us a cover letter and/or CV to [info@seracx.com](mailto:info@seracx.com) and in the subject line let us know what position(s) you are applying for.
