ABOUT SHIBMINATOR INU

**Shibminator Inu is a mutant from other Galaxy.
He is a decentralized and deflationary Token.**

A Meme Token, who sees it as his duty to make average earners rich.

The Project was built by two Developers who have been in crypto for a very long time.

Shibminator Inu has one special feature, he knows how to break through in the Market and makes x1000. He is Bullish.

Every Holdr can rest assured that their Investment is in good Hands, Liquidity is locked and the Contract is verified.

The experience and professionalism of Shibminator Dev's & Marketing Team will ensure that we shoot to the Moon.

FAQ

What are HOLDER Rewards?

Similar to dividends, HOLDR rewards get automatically sent by the Shibminator Inu Token Contract to all HOLDERS with SMI Token in their wallets. The more you HOLD, the larger your reward is. The funds rewarded come from the 4% HOLDR Rewards fee charged at transactions.

What is Automatic Liquidity?

For traders to be able to trade a token, the token needs a pool. The larger a token's pool balance is, the safer the hedge against price volatility or severe price drops. Shibminator Inu charges a 13% fee for Liquidity which gets deposited automatically into the PancakeSwap pool, ensuring the safety of the token.

What is the Max Transactions Limit?

When many People sell a token at once, its demand decreases and thus, so does its price. The Max Transaction Limit is in place to prevent whales (people with lots of money) from selling too much too fast, preventing nasty price drops.
