POWERFUL 2.0 CLASSROOM SPEAKERS

**A  
crucial  
tool that  
teachers should use  
to improve their efficiency**

Classroom speakers are crucial tools that teachers should use to improve their efficiency in the teaching and learning process because they address the issues that prevent students from hearing information clearly. Additionally, speakers are among the most affordable methods for improving speech and sound intelligibility of multimedia content, which further promotes student improvement, in contrast to other hearing enhancement equipment.

POWERFUL 2.0 CLASSROOM SPEAKERS

**Even distribution of sound  
around the classroom**

Classroom Speakers improve learning settings in addition to helping students hear better. This is because they help distribute sound evenly around the classroom, so all students—whether or not they have hearing issues—benefit from the technology.

PROINTEK™

## PROINTEK SPK 50

POWERFUL 2.0 CLASSROOM SPEAKERS

### Enhancement of ability to focus

Speaker technology makes sure that students are not disturbed by outside noises, such as those made by traffic or other students, which improves their ability to focus and hear clearly.

Teachers adore PROINTEK's Incredible Speaker System, which is designed, conceptualised, manufactured and supplied by PROINTEK for the Classrooms Market.

PROINTEK™

# PROINTEK SPK50

POWERFUL 2.0 CLASSROOM SPEAKERS

A powerful speaker system that keep the students engaged.

A powerful speaker ideal for playschools.

## **Increases attention level of the students**

Teacher's voice or the sound of any multimedia content is clearly audible and takes over the classroom setting, drowning out any background noise that may otherwise be distracting. Additionally, the speakers provide an equal opportunity for all students since they all hear the teacher's content regardless of where they are seated, unlike when there aren't any speakers in the classroom, in which students seated near the teacher tend to hear more of what the teacher is saying than those seated farther away.

The most common is instrumental yoga music, which can feature a wide range of Western, Indian, and ethnic instruments, sounds of nature, chants, etc.

Soothing, natural & clear sound of **PROINTEK SPK50** enable learners to focus more on Yoga & Meditation.

# PROINTEK SPK50

## 2.0 Computer speakers

**Perfect choice for SME / SMBs**

In simple terms, the role of a sound system is to amplify and adjust the sound quality of an audio signal, and then provide corresponding output from the speaker system that the listeners will hear.

**PROINTEK SPK50** is the most affordable 2.0 computer speakers, extremely powerful of 50-watt output with wooden housing produces clear & natural sound.

An ideal choice of **Small & Medium Enterprise.**
