The Italians of America Cultural Society of North Denver is not exclusive to those of Italian heritage, but rather open to any advocate of the Italian American Culture or who share in the belief of our mission and adheres to the bylaws of the Italians of America.

We endeavor to work together with our Italian American peers and Italian American Organizations in preserving our heritage and strengthening the fellowship of the Italian American culture.

We will impart in our young people the desire to carry on the traditions that our ancestors worked so hard to preserve. At the same time, we will support and encourage them as they labor to fulfill their own dreams and goals.

We strive to work with the benevolent heart and to help fill the needs of others through philanthropy, assistance, or simple supportiveness.

We desire to reach out to, and support, other cultures as they continue the preservation of their heritage, and we may work together for the betterment of everyone.
