

The Sam F. Ewing Care Access Fund

For Website

Inspired to Care Without Barriers.

At the heart of Sam F. Ewing's Care Access Fund is a simple belief: everyone deserves access to care, no matter their circumstances.

Turning access into outcomes.

We are renaming our current Care Access Program (CAP) to The Sam Ewing's Care Access Fund to eliminate gaps in care for uninsured patients in our community. Every day, we see patients fall out of care, not because treatment doesn't exist, but because access fails them at critical moments.

This fund is designed to directly intervene in those moments, covering the cost of care, medications, and services that keep patients engaged, supported, and healthy.

Every dollar donated goes directly to patient programs, including the Care Access Program—helping cover the cost of labs, testing, medications, and critical navigation services that help patients access and stay in care.

Your support ensures that:

- Patients can start and stay on prevention like PrEP
- Individuals remain connected to care without interruption
- Critical services like labs, testing, and medications are accessible when needed most
- Patients receive support navigating care systems and maintaining access to services

And this work is intentional and measurable:

- Gaps in care are identified and closed
- Patients are retained in prevention and treatment
- Barriers, including financial and navigation challenges, are addressed
- Outcomes are tracked to ensure long-term impact
