# Management Information Healthcheck

Your management  
information should be

## Future Ready

As your business grows, are you finding it harder to get the answers to the questions you have?

## Available

Do your people have access to the data they need, at the right time? Does it take ages for new reports to be provided?

## Simplified

Is your management information simplified, organised, consistent, easy to understand?

## Trusted

Is your information secure, controlled, reconciled, consistent?

If you think your Management Information is holding you back and you would like to know what could be done to easily improve it, then the Health Check is for you

## Healthcheck Process

**Our service is delivered by  
Simon Harrison ACMA CGMA**

*Simon has over 30 years experience, having held senior positions in Morrisons and Sports Direct*

We carry out an end to end review of your Management Information provision

**People, Processes, and Technologies**

And give you guidance on what can be improved, tailored for you

Not all businesses need the same solution

## 1. Review

A thorough on-site review of People, Processes, and Technologies

## 2. Report

We provide a concise report, performance scoring with benchmarking, covering all relevant areas and showing where improvements can be made

## 3. Ongoing Support

We support you with clear actionable steps to help you transform and address any weaknesses through training and a clear prioritisation of the critical path

*And if you would like us to help put these plans into action, we have the capabilities and references to do that too*

## Benefits

### People

We identify training needs and validate skills

We suggest development opportunities and assessments

### Processes

We assess the efficiency and effectiveness of how the current systems are being used

### Technology

#### **We do NOT want to sell you software**

We look at the suitability of what you have and provide recommendations and best practices for what you have

*From databases, to BI tools and any required systems integrations*

## Cost and Timescales

### Our Base Package

For organisations that have maybe grown quickly and the systems not kept up, with a small team of analysts and a range of data sources from ERP, Finance, Google Analytics

This would typically take around 15 days and cost £11,250

## How to get started

### Free Introductory call

We can schedule a call to discuss your requirements with Simon directly, typically this would be a 15 minute call which is always a great use of your time
