

Whytesnake rack

- 1) IEMs for the band, except for the bass player
- 2) Wireless mic for singer
- 3) Snake in and out for mic splitter so we can run our own IEMs.
- 4) Snakes are labeled for each mic output and also include's our backing track feed as well.

Wireless mic

IEM Vox

Rear View of rack with mic output from splitter to be connected to stage box for FOH

Yamaha Mixer

8 channel mic splitter

8 channel mic splitter

Front View of rack with mic inputs for drums etc

- 1) All stage mics connect into our mic splitter at the front of WS rack.
- 2) All the same mics feed out of splitter and WS backing tracks output via a snake provided by WS to FOH stage box.
- 3) WS will mix own IEMs except the bass player needs a wedge from FOH.
- 4) All audio snake signals are labeled for easy connection to FOH stage box.
- 5) WS will also provide a vocal doubler for FOH to mix on all backing vocals.
