Work Logs				
Name	Description	Quantity	Total Hours	Total Hours To Date
 Naomi Jeanette Robinson Trucking (Tariq Robinson Owner)	5:53am hauling Vehicles in spirit at planet fitness	1	12	13
	6:01am taking off rain suit inside planet fitness for a 10 minute workout			
	6:08am on exercise bike. A lot of walking hauling cars			
	6:18am shower time			
	6:46am stopping at Walmart			
	7:51am on my way to Lowe's no stops and going on Lowe's Pro specialist management			
	6:04pm at Starbucks looking over website and changes I am thinking about conducting			
	First change is what market am I investing into as my main source of income. I am looking at Lowe's and if I was in corporate what I would like to see or achieve in the stores.			
	Second I am looking at brokering loads.			
	Third looking at a house I like to buy or RV to purchase.			
	8:33pm I have done the management. I will change the website tomorrow., I present my case to board of share holders in starting the business. Vehicles is a rough market in this economy with Trump Tariff without a contract deal. Open deck trailers is best to start brokering and as a Owner Operator.

Looking over the Heavy Haul industry and vehicle transport. The market is not friendly with the working class in buying new vehicles (American Vehicles) The American Vehicles GM (Chevy, Only sell Corvette and this car is priced at \$100K or better. How many vehicles are going to be sold in a environment that makes \$100k Combined Income. The monthly income will be \$8,333.33 Monthly Gross

Total Hours of 172 Hours and a hourly rate of \$48.45 hourly gross. A new Corvette Build is not designed for the working man unless a house is refinance to obtain the money. In todays market it is not wise to borrow from 104K to buy a new car.

So that being said delivery cars is best to have a fleet account with the government.

It might be wise to build the corvette by hand to get a demand for the car instead of a supply of cars in the Eastern North Carolina market.

To ship cars in bulk i need American to meet the Honda, Toyota, Nissan and Mazda market to ship American Cars.

In Shipping GM and GMC Trucks. It would be better to ship them on a step deck contract. Business owners and Retire outdoors enthuses.

In American Vehicles over 60% of the new Vehicles are still in the lot where the living wages are \$20.00+ per hour. On a 10 Car Transporter only 4 vehicles are sold out of 10 in these markets. It is a used car market. However some used cars are more expensive than new. Then we have Repo Vehicles being sold in auctions and resold again. You have wreck vehicles being ship to junk yards for parts.

I need to sit down with Operations Managers and see what they offer to ship cars. American Automakers will not make a vehicle that is not selling. So once again it is best to get a distrubtion deal with the government where every year they buy certain amount of vehicles.

We are getting established in this market where business is dropping out of the market because of overhead expenses. So i need to be perfect to get in the door.

Lets stick with Heavy Haul and General Freight. My construction experience will boost me up in the market.

We need to be perfect in hauling cars as i first choice.

2. STARBUCKS

500 N. Wesleyan Blvd.
Rocky Mount, NC 27804
(252)451-0123

Is it beneficial to live off the grid in a RV or Tow Behind Motor home in today's market? You lose money on a RV if you try to sell it It is better to trade it in. You can't borrow money off the RV like a house. You can always get a loan if you own a home. In today's market unless you have enough funding to maintain. It is best to buy land and a home and get the equity off the home and that will substain you over time. It is best for me (Company Stock Holders) to buy a house and than a RV

So i need to have land and a house, Now houses today are very expensive, \$800k and up however to have a business i need land and a home.

Now, i need a place to park the truck. Now the big sleeper comes into play. I could get a 180" Big Sleeper

and haul general freight. I could make money as working from home.

Construction Market is 50/50 For instance. You need 7,000' of lumber. you have 6' - 8' - 10' - 12' - 16' lumber

Now if you buy

4"x4"x6' lumber at \$8.88 per board = 1,167 Board for \$10,362.96

4"x4"x8' lumber at \$10.28 per board = 875 Board for \$8,995.00

4"x4"x10' lumber at \$14.88 per board = 700 Boards for \$10,416.00

4"x4"x12' lumber at \$17.88 per board = 584 Boards for \$10,441.92

4"x4"x16' lumber at \$23.78 per board = 438 Boards for \$10,415.64

Now the inexperienced customer will order 875 board of 4"x4"x8' because the cost is \$8,995.00 not knowing a bundle is 212 pieces in a bundle meaning = 4.13 bundles to meet the demand. Then you will have waste of lumber. If you have 7' Post you have 1' from each board = 875' / 6 = 146 boards you could have saved and you spent an extra of \$1,296.48 then you have to pay for clean up as well. Not wise to buy this if you have experience in the industry. If you are a contractor it is extra bid in the job (pocket cash because he will charge you for a dumpster, labor cost, trucking cost. So you are paying 1.5 times or more for the lumber cost.

Now if you buy the 12' Lumber and you have 7' post you have 5' of post you could use. You could use the 5' Post and cut it at 4' and use the 4' into the concrete tube and use a joist hanger for 3' extension and you have 1' waste x 584 boards = 584' / 12' Lumber = 49 board = \$876.12 in waste plus clean up cost

Now if I buy the 16' lumber. I need a trailer to hold 16' Lumber or pay to have it delivered. Then I have 7' post. I can make 2 post with one board and have 2' waste on each board.

2' x 438' = 876' total waste / 16' = 55 board = \$1,307.90 in waste plus clean up cost

The owner is looking at installation cost not waste cost. So it is best to have less waste cost to eliminate additional charges on the back end. The waste cost the homeowner is not expecting to have. That's how a contractor makes his money.

Being the Delivery driver. I want the percentage of the gross commodity. So I will say 12' Boards is best for the job.

The Construction Company is saying 8' boards is best. One cut and the 1' Waste on the higher quantity of boards is best. I get paid twice.

The former is saying 10' Boards. The 3' Waste I could use in the concrete tube with Joist Hanger inside the concrete and I can finish the job before deadline. Less clean up and repairs to the property.

Now, do you see how small contractors make their money. They give you a rate for material. You choose the lowest rate and the highest clean up rate.

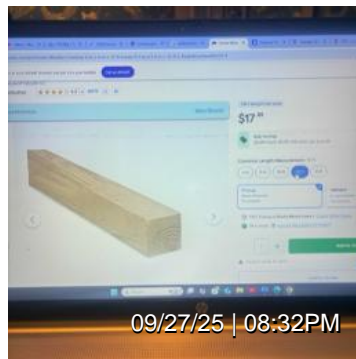

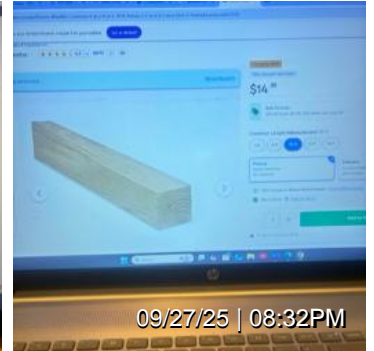

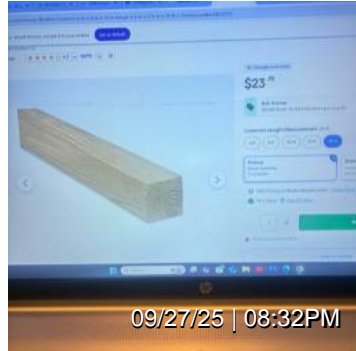

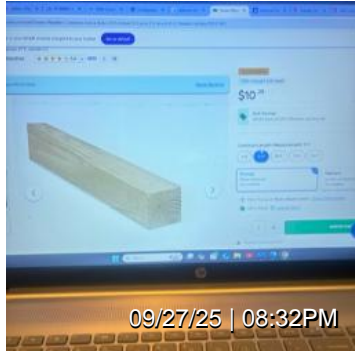

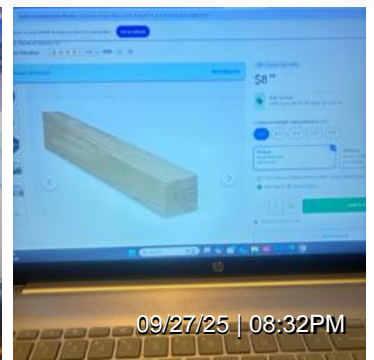

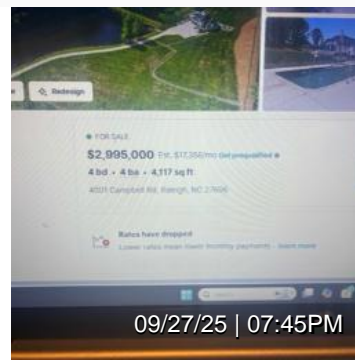

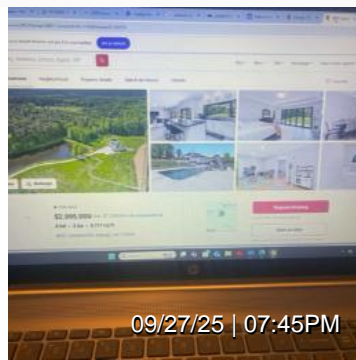

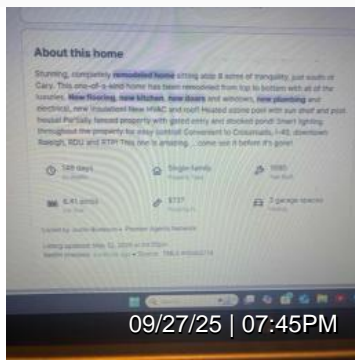

Now, when the economy is in the situation right now. The homeowner says it cost me me \$9,000.00 in material to his neighbor and the neighbor has paid \$10,500.00 and they said you got robbed. Then you say what was your labor cost for the job. You paid overall less his money went into labor and clean up. In which you got done faster and saved money.

Now, do you see construction is slow the country as a whole is in trouble.

Now it is best to buy a house to get the equity you do in fixing your home in case you sell it. You will not get more for the RV than what you paid for it new unless it is a classic and you had it for generations to generation.

Big sleeper and heavy haul is best to start. Homeowner is getting robbed and doesn't even know it they only see material cost.

Site Safety Observations

1. STARBUCKS
500 N. Wesleyan Blvd.
Rocky Mount, NC 27804
(252)451-0123

Website was based on Transportation Engineering. I need to focus on foundation in which i can get a funding for the business. If Jesus open the door for us. He needs a plan what we will do in his name. I need to focus on Construction and building supplies.

A concrete Mix Pallet hold 42 bags x 80 lbs. = 3,360 lbs.+ 40 lbs. Pallet = 3.400 lbs.

Normal Shipping is 42,000 lbs. / 3,400 lbs. pallet = 12 pallets

12 pallets x 42 bags = 504 Bags

504 Bags x \$5.98 per bag = \$3,013.92 Gross Commodity

\$3,013.92 Gross Commodity / 12.5% Brokering Gross Income = \$376.74 per load. How far will \$300.00 go in Logistics

Today's Flatbed Trendsline is \$2,66 per mile (\$376.74 per load / \$2.66 per mile = 141 Miles delivery)

If Trump impose a tariff on Portugal Belgium Blocks and concrete into this country. It goes to the Federal Government not to Logistics shipping. So the rate of jobs increase. When the construction cost is unbalance. It will take Jesus Logistics to fix the budget.(Strong and Severe Storms) When the supply of construction material is high and the demand for work is low. That when we are in a recession. The people can't afford the prices of labor. So To make remodeling more affordable now Construction machines are

remote control and electric to reduce the operation cost to make remodeling more affordable for small business owners. Renting Smaller Equipment and hiring more labors to do more manual labor to give jobs. That when Border Control comes into play. People working under State wages and hurting the small business owners.

All these comes into play when starting a business in today's market. If no construction than war is next. To reduce the population to have a Supply of jobs with a demand of people. That is when the market pays more per hour to employees because no one is available.

When we invest into robotics we take away supply and demand to the working community. Now we have low wages being paid and the cost of living is high. So the Government Give welfare and housing assistance to the public. Once again it come with public transportation because the vehicles are affordable for section 8 unless incentives are given to auto makers for affordable cars. So Public transportation has to be the main topic of our Government. However our weapons and military is our #1 priority. So the Government does not put more money into States unless it is for military or schooling.

Now we need bridges for buses and trains. You will have a push for more rail laying for trains. a push for more buses. Then more repairs to the roads. Once again building material is the best introduction into the industry.

Heavy Haul i can get into this market with starting a construction company associated with Real Estate and Natural Disasters. God will always create work for construction. How will God supply work for Vehicle Transport other than damaging cars in a natural disaster. Then the insurance payout still won't be enough to get the payment under \$400.00 in most cases. So they are force to down grade their vehicle or buy used.

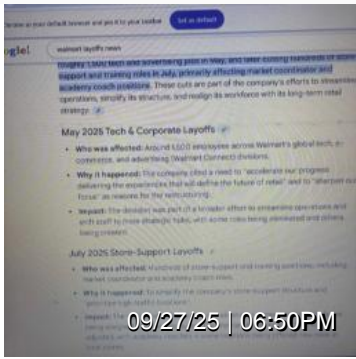

Walmart is moving distributions jobs to Mexico and investing in AI to balance the overhead cost. meaning cutting jobs to Americans. The Americans Wants has decreased and the Americans needs are a tight budget. Then young generation is not working and that makes supply chain chaos as well.

We have two possible hurricanes in the Atlantic threatened the Carolinas Next week. This will put more money back into the community. Once again Jesus Logistics is for Heavy Haul Tractor and General Freight Tractor.

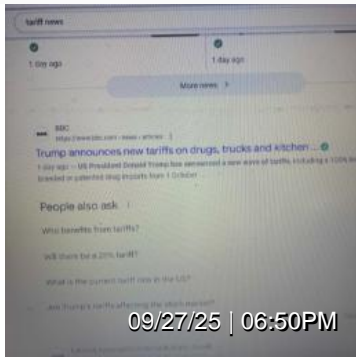

In General Freight with today market
