

## GreenX Signs Research Service Agreement with the Research Foundation of the University of Seville

On 4 October 2023, GreenX Technology Limited signed a research service agreement with the Research Foundation of the University of Seville (FIUS).

Under the agreement, FIUS will carry out testing and physicochemical characterisation of heterogeneous catalysts based on GreenX's proprietary design principles. Through systematic performance evaluation and structural analysis, the collaboration aims to validate the feasibility of GreenX's catalyst design approach and further support the optimisation of high-performance catalytic materials.

This agreement marks an important step in GreenX's expansion of its European research collaboration network and reflects the company's ongoing commitment to strengthening international partnerships in advanced catalyst development and technology validation.
