

N.H.F**KIN.S

North Wales Designer Louise Morgan is proud to announce the release of her graduate collection titled, N.H.F**kin.S.

As you can gather from the title, N.H.F**kin.S is inspired by the decades of underfunding the N.H.S has had to live through. With it coming to head recently with a historic record of strikes from nurses, doctors and anyone within the service.

This collection aims to inspire people to use their vote responsibly and think about the future of our N.H.S within the leading party. As a country we are at a breaking point with public services failing, food banks are at an all time high and yet the rich keep getting richer.

Each piece is meticulously crafted with every seam, detail and thread considered. Creative pattern cutting combined with classic tailoring a deconstructed-reconstructed aesthetic is achieved.

Using deadstock and sustainably sourced materials Louise Morgan brings a womenswear collection that packs a punch.

"SUSTAINABLE DESIGN, POWERFUL MESSAGE"
