

Concrete Paver Cleaners

- Selective Cleaning
- Enhanced Aesthetics
- Minimized Damage
- Improved Appearance
- Extended Service Life

DESCRIPTION AND USE

FABRIKEM® manufactures a series of cleaners designed for the general maintenance cleaning of a variety of concrete paver and hardscape surfaces. These cleaners remove efflorescence, rust, oil and grease spatter, moss and algae, as well as delaminated sealers.

FABRIKEM® EFFLORESCENCE REMOVER is designed for cleaning efflorescence and "stacking" stains from concrete pavers and hardscape without damaging the surface of the units. It is a proprietary blend of mild non-acidic salt solubilizers, surfactants, wetting agents, and detergents. It does not contain muriatic, hydrofluoric, or sulphuric acid.

FABRIKEM® PAVER RUST REMOVER is designed for removing rust staining from concrete paver and other hardscape surfaces. It is especially suited for removing residual moss killer stains from pavers. It is a proprietary blend of non-acidic solubilizers, surfactants, wetting and sequestering agents.

FABRIKEM® PAVER DEGREASER is designed for removing oil and grease stains. It is ideal for cleaning barbecue drippings as well as removing motor oil deposits. It is a targeted formulation of saponification ingredients, surfactants, wetting agents, and rinse aids.

FABRIKEM® MOSS & ALGAE CLEANER is designed for cleaning organic growth from a variety of masonry and hardscape surfaces. It is a special blend of biodegradable ingredients, surfactants, and wetting agents.

FABRIKEM® WHITE OUT is a special blend of solvents and resin solubilizers designed to aid in the re-deposition of delaminated acrylic sealers. By converting the cured sealer back into a solution, it helps facilitate penetration back into the substrate causing the "whiteness" to disappear.

ADVANTAGES

FABRIKEM® CONCRETE PAVER CLEANERS employ special wetting agents, detergents, inhibitors, and surfactants, which provide the necessary properties for effectively cleaning the specific substrates and conditions noted above. Each product is formulated to remove specific stains while minimizing any damage to the paver or hardscape concrete surface.

APPLICATION

Preliminary testing should be undertaken to determine product selection and concentration required for effective cleaning. Individual data sheets are available for each product outlining application procedures. Consult the manufacturer for specific details.

GUARANTEE

All FABRIKEM® CLEANERS are manufactured with the finest raw materials, under exacting care to produce products of the highest quality. FABRIKEM MANUFACTURING LTD., as always, guarantees its products when applied in accordance with its printed instructions. Results of inadequate surface preparation, improper mixing, incorrect application, inadequate protection and other factors beyond the manufacturer's control cannot be held to be the manufacturer's responsibility. No responsibility can be accepted beyond the purchase price of the product.
