## Understanding the Decline of the HoneyBee

Honeybees are vital pollinators crucial for our ecosystem's health. However, their populations are declining at an alarming rate worldwide, posing a significant threat to agriculture and biodiversity.

### Causes

- Habitat Loss: Urbanization and expansion diminish honeybee habitats.
- Pesticide Use: Harmful chemicals in pesticides weaken honeybees' immune systems.
- Climate Change: Altered weather patterns disrupt honeybee foraging and breeding cycles.
- Diseases and Parasites: Varroa mites and other pathogens weaken honeybee colonies.

### Impacts

- Reduced Crop Yields: Declining honeybee populations hinder pollination, affecting our food production.
- Ecosystem Imbalance: Honeybees play a crucial role in maintaining biodiversity and ecosystem stability.
- Economic Consequences: Agriculture and industries reliant on pollination face financial losses.

## Conservation Efforts

- Habitat Restoration: Creating bee-friendly habitats with diverse flowering plants.
- Pesticide Reduction: Implementing integrated pest management practices to minimize pesticide usage.
- Climate Action: Supporting initiatives to mitigate climate change and its effects on pollinators.
- Disease Management: Researching and developing strategies to combat honeybee diseases and parasites.

# What's Included?

A custom painted, double deep with medium honey super beehive fully equipped with all winter and summer gear. The hive will be painted and decorated with your company colors and logo! If 8 or more hives are supported, they will be set up in an exclusively bespoke apiary.\* Custom apiary supporters will have the opportunity to schedule an in person inspection of their hives for up to 4 team members!

A full time, dedicated beekeeper to ensure and maintain the health of the hive year round. They will be in charge of all treatments, feeds, supplements and manipulations required to keep the hive healthy, expanding, and vibrant.

A colony of bees with a fresh, young queen who is ready to begin laying and growing her colony.

Bimonthly updates on the status of the hive ready for social media use so you can showcase your company's contributions to the bee population and the environment.

Up to 15 bottles of honey, fresh from the hive, with custom crafted labels featuring your company name and colors (or anything else you would like).

\*All hives will be placed on a property of MoreBees, LLC to eliminate the liability to client companies.
