

Hi guys we hope you're all well. It's been a busy few weeks and we want to thank you all for putting your trust in us.

The Country Images publishing manager Scott Burgess came to interview us and the children thoroughly enjoyed it. They told Scott our story and how the idea of what we do came to life.

The idea behind the doggy holiday originally came from the children, many years ago. They were playing in the hot tub and decided our own dogs wanted to swim with them. It was during the summer holidays. The dogs loved it but after I had calmed down the children asked the question can dogs go on holiday? To which I answered yes but in a young child's mind holiday is the seaside with the beach and were you can play in the sea. So I started to think and along came the different activities and areas to represent the seaside.. But the ideas didn't stop there, the dogs needed their hotel rooms which are their suites with television and air conditioning and now an indoor play centre.
